Shaltari Abilities

Famous and Faction Admirals may take additional Abilities from the following table when building your lists. Each Famous and Faction Admiral will state the amount of additional Abilities they may take. You can only take each Ability once per list.

Cost	Effect
*AP	**Impel Mines:** Once per game, at the start of the Activation Phase, choose up to three different friendly Ships within 18" of a friendly Ship with the Mothership special rule. Those Ships gain 1 Impel Mine Launch Asset until the end of the game. This Ability costs 1AP for each chosen Ship.
2AP	**Advanced Picket Ships:** When you raise a group's shields, until the start of its next activation, it does not triple its signature value. If that group is H or C tonnage, this ability costs 3AP.
1AP	**Launch Gate:** When a friendly Carrier launches Fighters or Bombers, those Launch Assets may be launched through a Gateship chain, counting as a Dropship for the purposes of the Gateship-X special rule.
1-2AP	**Navigational Mastery:** At the start of a friendly Group's activation, until the end of its activation, that Group gains Vectored and increases its Thrust by twice the AP paid to use this ability.
1AP	**Power to the Weapons:** At the start of a friendly Group's activation, if that Group has the Shield-X+ special rule, that Group may attack with any number of its weapons on General Quarters, but cannot raise its Shields or gain a shields token. If this ability is used on a Group with 4 or more Weapon Systems, this Ability costs 2AP.
*AP	**Lives of Experience:** At the start of each round, pick one Ability from any other Admiral on the table. This Ability becomes a copy of that Ability until the end of the round.

Shaltari Admirals

Shaltari Skychief
Admiral Level 1 – 25 pts

Cost	Effect
*	This Admiral may take 1 additional Ability from the Shaltari Ability Table.
1AP	**Voidgate Redeployment:** At the start of the Asset Phase, before Battalion Combat, select a Dropsite or Feature containing friendly Battalions. If that Dropsite/Feature is within 3" of a friendly Ship with the Gateship special rule, you may move a number of friendly Battalions assigned to the selected Dropsite or Feature to another Dropsite or one of its Features within 3" of another Ship in the same Gateship chain. You cannot move more Battalions than the Gateship-X value of the final Ship or Dropsite used in the Gateship Chain.

Shaltari Starchief
Admiral Level 3 – 65 pts

Cost	Effect
*	This Admiral may take 1 additional Ability from the Shaltari Ability Table.
2AP	**Overclock Gates:** At the start of the Activation Phase, pick a friendly Ship with the Gateship-X rule. That Ship doubles its X value until the end of the round. A Ship can only be affected by this Ability once each round.
3AP	**Espionage:** When an opponent declares the use of an Ability, negate that use of that Ability (AP is still spent as usual and subsequent uses are unaffected).

Shaltari Launch Assets

Load	Thrust	Att	Lock	DMG	Type	Special
Torpedo	6"	9	4+	1	C	Flash-2
Bombers	13"	2	3+	1	E	-
Fire Ships	7"	4	5+	1	K	-
Mines	6"	4	3+	1	E	-
Impel Mines	6"	3	4+	1	E	Arrest-4, Impel-1

Load	Thrust	Re-rolls
Fighters	16"	1

Shaltari Deployable Features

PTS	Type	ES	KS	Hull	Special
15	Stellargate	4+	4+	3	-

Load	Launch	Special
Fighters & Bombers	2	-

After Battalion combat on this Feature's Dropsite, if it contains **any number** of friendly Stellargates, deploy **one** Battalion to that Dropsite. A Dropsite can only have a single Battalion deployed to it this way each round.

While you have one or more Stellargates on a Dropsite, that Dropsite counts as a Controlled Dropsite with Gateship-X for the purposes of the Mothership special rule, where X is the total number of friendly Stellargates on that Dropsite. Additionally, the Dropsite forms a part of a Gateship chain with friendly Gateships and Motherships within 18".

PTS	Type	ES	KS	Hull	Special
10	Electrosurge Torus	4+	4+	3	-

Electrowave Caster: Effects caused by this weapon's Status rule are removed at the start of next rounds End Phase instead of this rounds End Phase.

Name	Scan	Att	Lock	DMG	Type	Special
Electrowave Caster	8"	3	2+	1	E	Close Action, Escape Velocity, Status

---

PTS	Type	ES	KS	Hull	Special
5	Worldstrider	4+	4+	3	-

When you activate this Feature, you may pick another Feature on its Dropsite and roll a dice. On a result of a 3+, remove that Feature and any Battalions deployed on it from this Dropsite. If any Battalions are removed due to this rule, roll a dice. On a result of a 5+, this feature remains in play, otherwise, it is removed.

Twins of Aaru – Amber x 2	237 pts (45 + 192 pts)
Famous Admirals Level 2 & 2 Cruisers	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	2	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery	F/S	5	3+	1	E	Reave-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1

Twins

This Admiral counts as being in both Amber Cruisers in this Group and is only removed once the Group is destroyed.

Cost	Effect
*	This Admiral may take 2 additional Abilities from the Shaltari Ability Table.
2AP	**Cunning Positioning:** When you activate a Group, for that Group's movement this activation, it may choose a direction in its Front Arc to move, retaining its original facing. If that Group is M tonnage, it also gains Vectored until the end of its activation

The twins have been sighted working alongside various tribes. Which has led UCM intelligence to believe they are some type of mercenary within Shaltari culture. However, their modus operandi is the same every time. Arriving in a pair of Amber class cruisers they will work with other cruisers and, via methods unknown to the UCM at this time, will increase the maneuverability of those ships giving the Shaltari fleet an unexpected advantage.

They are never seen separated, and even if one is destroyed, the next time they engage in fleet combat they'll be back together as a pair of Ambers. Causing chaos and disrupting even the most carefully laid plans by the Reconquest forces.

Any Communication with the Twins has seen them actively mocking and teasing any forces they are battling, seemingly enjoying the chaos they cause and the destruction with a relish that seems unnerving.

Seth – Sapphire	195 pts (45 + 150pts)
Famous Admiral Level 2 & Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	13	5+	4+	6+	1	Shield-4+, Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Ion Aura	F/S/R	6	3+	1	E	Close Action, Scald-2
Ion Storm	F/S/R	6	4+	1	E	Bombardment, Scald-1
Gravity Coil Pair	FN	4	2+	1	E	Impel-2, Reave-1

Gravitational Draw

Whenever this Flagship's Gravity Coils would cause a ship to turn due to the Impel rule, gain 1AP.

Cost	Effect
*	This Admiral may take 1 additional Ability from the Shaltari Ability Table.
2AP	**Master of Gravity:** At the start of this Admiral's activation, pick an enemy Group that has not activated this round. Turn all Ships in that Group up to 90 degrees in the same direction. Ships of H or C tonnage may make a Backup save to reduce this effect to 45 degrees instead. Backup saves rolled this way cannot be affected by Abilities.
2AP	**Gravity Assist:** At the start of a friendly Group's activation, turn all Ships in that Group up to 45 degrees in the same direction. Ships in that Group gain Vectored until the end of the round.

Starchief Seth is part of a Shaltari Tribe that specializes in the use of Gravity weapons. The use of these esoteric Shaltari weapons is incredibly hard to plan against, it's easier to defend against a weapon that destroys you, but one that has you turning the wrong way and flying towards your own fleet is much more difficult.

Seth exemplifies these battle tactics of his tribe, his gravity weapons are more powerful than usual, a potentially unique modification in the otherwise standardized Shaltari arsenal. His ship will go in and out of orbital levels without any effort, allowing him to stage ambushes where, with a few well-placed shots, leaves an enemy battle plan in tatters.

His Sapphire Battlecruiser is a dreaded sight for any Reconquest leader, as soon as he is spotted, they know their best laid plans are already laid to waste. As often with the Shaltari, communication is erratic, and Seth has been known to engage in quite active communication at times, seemingly acting friendly, right up till he can activate his gravity weapons.

Mergen the Learned – Diamond	295 pts (65 + 230pts)
Famous Admiral Level 3 & Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	18	4+	3+	5+	1	Mothership, Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Particle Lance Triad	FN	3	3+	2	C	Critical-2, Focused
Harpoon Deluge	F/S/R	8	4+	1	K	Close Action

Load	Launch	Special
Dropships	1	-

True Disintegration

Whenever an attack from this Ship would cause an enemy Ship of M or greater Tonnage to be destroyed, that Ship automatically scores a Reactor Overload Explosion Effect but reduces the Core hits caused to 2. Friendly Ships ignore Explosions caused by this rule.

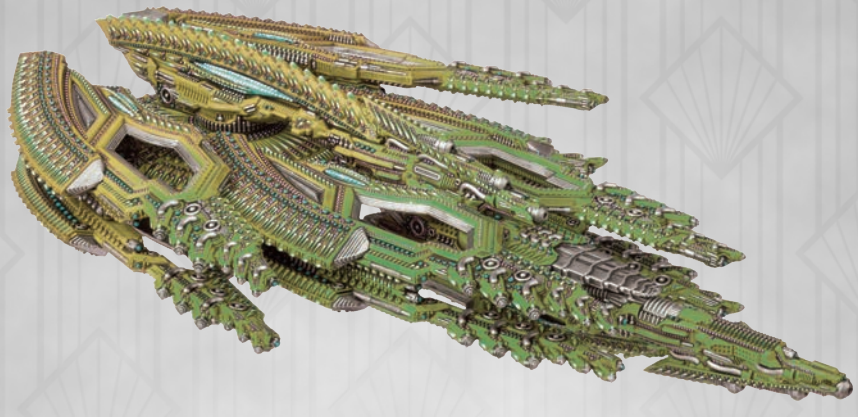

Cost	Effect
*	This Admiral may take 4 additional Abilities from the Shaltari Ability Table.
1AP	**Ancient Teleportation Node:** Once per round, at the end of the Planning Phase, target a Dropsite with friendly Battalions on it. That Dropsite gains the Gateship-1 special rule until the end of the round, treating the Dropsite as a Ship for this rule (any other rules are unaffected).

Mergen the Learned claims to have been alive long enough to have borne witness to the Shaltari's exodus from Aaru. Whether or not this is true can be left up for debate, but what is known is that this alabaster elder is an incredible tactician. Proving pivotal in the recapture of Aaru, Mergen was able to recall the exact sites of dormant Shaltari teleportation nodes. With this ancient knowledge Mergen's flagship, The Heart of the Mountain, was able to deploy vanguard battalions to critical locations ahead of the main Shaltari host.

In the void battles above the planet, Mergens fleet was responsible for sending a fifth of what Scourge remained above Aaru to their demise. The only other Starchief to achieve a similar number of confirmed kills was Quetzalcoatl, unsurprising given their martial prowess.

With the void above Aaru all but captured, Mergen is able to turn his attention to restoring the buried teleportation network on Aaru. Once his work on Aaru is done, the reclamation of other Shaltari strongholds awaits his attention.

Quetzalcoatl – Uranium	495 pts (85 + 410 pts)
Famous Admiral Level 4 + Dreadnought	C / 60mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	14"	8"	22	4+	3+	5+	1	Mothership, Shield-3+

Harpoon Deluge	F/S/R	8	4+	1	K	Close Action

Load	Launch	Special
Dropships	4	-

Radiation Aura

At the end of this Ship's activation, each enemy Group within 4" suffers D3 Core hits.

Cost	Effect
*	This Admiral may take 2 additional Abilities from the Shaltari Ability Table.
2AP	**Radioactivity:** Before any player rolls for Explosion (friendly or enemy), make the final result of that roll a 5.

Prime Starchief Quetzalcoatl has been a bane of UCM and PHR forces for the entirety of the Reconquest. Far too often the forces of one of the branches of Humanity will be winning an engagement against the Scourge only for Quetzalcoatl to arrive with his fleet and engage the existing combatants. In short order Quetzalcoatl annihilates the Capital Ships in the area and will then quickly leave the engagement, handing the Scourge a crucial victory.

However, the very next day, as the Scourge seem close to victory, he'll reappear and destroy any Scourge Capital ships before they're able to retaliate and again leaves the area, handing victory to whoever is facing them. Quetzalcoatl's interference as part of a tribe that has not formally made itself known to the UCM shows that there are yet more Shaltari tribes that seek to prolong the conflict between Humanity and the Scourge.

No attempts at communication have succeeded, and he has been given a threat level of the highest priority, however currently, no one from the UCM or PHR have managed even the most cursory of communications with them, only gleaning the name from Pungari mercenaries that have themselves, only heard of Quetzalcoatl in name and reputation.

Voidgate	15 pts
Voidgate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	2"	1"	3	5+	5+	-	1-3	Descent, Gateship-2 Shield-4+

Open Network

In a round this Group is deployed, it activates following the normal activation, group, and deployment rules. In subsequent rounds all of your Open Network Ships count as being part of a single Group. Ships in this single Group choose their orders and whether to raise their shields individually when the Group activates. From the second round onwards, all friendly Open Network Groups count as a single Group when generating Pass Tokens.

Open Network Ships ignore Coherency rules (and do not gain Formation Benefits), have no Lead Ship, are targeted by attacks individually, and these attacks can only damage and affect the targeted Open Network Ship.

Crippling Effects, Spikes, and other rules that affect an entire Group only affect the targeted Open Network Ship.

The bizzare nature of these 'ships' has resulted in the unique classification of 'voidgate', devoid as they are of unique character. Indeed, the Shaltari seem to share this opinion, rarely naming them and or giving them more than a skeleton crew.

These vessels loosely fulfil the same tactical role as strike carriers for other races, although they do not actually carry troops. Instead, they merely act as a conduit for Shaltari teleportation, transferring Gates (such as the Eden and the Gaia - Shaltari analogues to dropships) from an orbiting mothership to the atmosphere. Since a voidgate must be present in the immediate vicinity of the dropsite, it must physically move to where the teleported construct(s) are to re-materialise. This removes the risk to the forces before deployment as they are never physically present aboard the voidgate, but are instead aboard a much larger and tougher mothership. Voidgates can also re-route forces between each other once on the ground, affording the Shaltari immense tactical flexibility to counterbalance their low numbers.

Voidgates also create a substantial field of energetic disturbance in the air. This energy can be unleashed against nearby enemy atmospheric assets, such as strike carriers, dropships or bulk landers and can also take the place of defence batteries in a tactical sense, since the Shaltari have no bulk landers of their own.

Glass	20 pts
Cloudflyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
16"	8"	1"	1	5+	5+	-	2-4	Descent, Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Ion Lance	F	5	4+	1	E	Air to Air, Close Action

Encountered ships of the class: Aetherwind, Rainmaker, Sharp Spear, Dreamscape

These tiny vessels fulfil the role of the corvettes of other races, although they are smaller even than those diminutive ships. They are designed solely to hunt enemy atmospheric assets and are extremely fast. These ships are favoured by the most aggressive Shaltari with the least fear of death and as such are generally crewed by Firstborn Shaltari new to the arts of naval warfare. They have a small crew of just twelve individuals and feature no shields due to their size, their pace and atmospheric capability their best protection against the enemy.

Typically, they hunt in packs, utilising their compact but lethal ion cannons to rake the hulls of the larger strike carriers which are their preferred prey. Although not as dangerous as a Corvette alone, their cooperation can quickly reduce the target to so much falling debris in a matter of seconds.

Helium	29 pts
Voidflyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
16"	8"	1"	2	6+	6+	-	1-4	Descent, Shield-5+, Vectored

Name	Arc	Att	Lock	DMG	Type	Special
Pulse Blaster	F/S	3	3+	1	E	Close Action, Penetrator

Void Skip

If this Group goes on General Quarters within 6" of a friendly Ship or controlled Dropsite with the Gateship-X special rule, instead of moving normally, you may place the Group in coherency within 6" of a friendly Ship with the Gateship-X special rule in the same Gateship chain facing any direction on any Orbital Layer. If it does, this Group gains a Spike.

Encountered ships of the class: *Mist Warrior, Auru's Ghost, Sudden Lash, Ether Rider*

The Helium Voidflyer is a slippery adversary and a worrying technological twist in Shaltari naval combat. Troops on the ground are sadly familiar with the aliens' capricious ability to teleport battlefield-level vehicles in and out of hot zones via their gate network. On a strategic level, naval planers have considered this tech limited to deployment of smaller constructs - not so, it seems.

The Helium can leverage the existing voidgate network to teleport across the battlespace instantaneously. That the Helium is orders of magnitude larger than anything previously known to possess this ability has raised concerns at the highest level as to what it means for the future - is this new tech, or have the aliens simply deigned to switch tactics? Either way, the prospect of whole starships vanishing and appearing at will likely chill the blood of any captain, despite the small size and short ranged weapons of this new threat.

Topaz	38 pts
Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	10"	3"	4	5+	4+	-	2-4	Shield-5+, Vanguard-4"

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Bank	F	3	3+	1	E	Reave-1

Encountered ships of the class: *Sunrise, Cacophony, Green Depths, First of Bastet*

The Topaz is the most common Shaltari frigate design encountered by the UCM and has been seen in use with every known Shaltari tribal fleet. It fulfils a role and mode of attack similar to the standard 'gun' armed frigates in other races, such as the Toulon, Harpy and Europa. Like most Shaltari ships, the Topaz features an advanced shield system which can be raised for protection or lowered to take advantage of its very small signature. These shields are crucial if the enemy is able to get close enough to engage, as Shaltari frigates are poorly armoured without them. The Topaz is also the bane of supply convoys, where it wreaks havoc on lightly defended adversaries before melting away on silent running.

Its primary armament is a prow mounted Disintegrator bank – a powerful weapon for a ship of its size although restricted to the front quarter in engagement zone. As such, effective positioning is crucial to get the best out of these nimble ships. Their energy weapons do however allow for some variance in facing, making the Topaz more flexible and general purpose than its cousin, the Jade.

Jade	45 pts
Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	10"	3"	4	5+	4+	-	2-4	Shield-5+, Vanguard-4"

Name	Arc	Att	Lock	DMG	Type	Special
Particle Lance	FN	1	3+	2	C	-

Encountered ships of the class: *Corona, Years Behind, Lamenter, Emancipator*

The Jade class frigate is a more focused design than its cousin, the Topaz. While using the same basic hull, this vessel mounts a single highly dangerous, if restrictive, particle lance. This weapon's effective fire arc is very narrow, forcing the Jade's captain to be very deliberate about engaging the enemy. Typically, these fast vessels are assigned to flanking operations against rearguard targets or to attack specific, high value assets in the early stages of a battle. The Jade class is also a favoured choice for small Shaltari raiding parties since isolated targets are picked off with speed and precision before any response can be brought to bear.

Its particle lance has a lower destructive power than the weapons of most other Shaltari frigates, but what it lacks in damage potential, it makes up for in armour penetrating ability. Its highly focused and devastating beam can slice through any known armour with contemptuous ease, almost always causing meaningful damage with a successful hit. As a result, it is often used against a heavily armoured opponent, whose protections are meaningless against the Jade's attentions.

Opal	49 pts
Shielding Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	10"	3"	4	5+	4+	-	1-2	Shield-5+, Vanguard-4"

Name	Arc	Att	Lock	DMG	Type	Special
Harpoon Strike	F/S/R	2	4+	1	K	Close Action

Shield Booster

While this Group has a shield token, other friendly Groups in coherency within 6" of a Ship with this rule improve their Shield-X+ rule by 1 to a maximum of 3+. Ships with this rule are unaffected.

Encountered ships of the class: *Stark Lantern, Talisman, Immortaliser, Endless Dominion*

The Opal class frigate is a highly specialised ship and thankfully for the UCM, rarely encountered. It carries minimal offensive weapons since its role is defensive in nature. Most of its internal structures are interlaced with a complex eldritch projection system designed to boost the effectiveness of the shields of a nearby vessel, as long as those shields are raised. This makes the Opal a highly effective escort ship for larger vessels.

As almost all Shaltari elders are obsessed with and focused on the continuation of their ancient lives and as such these ships are highly valued as escorts for flagships. It seems however that despite the Shaltari's obvious mastery of technology, this vessel is very difficult to produce, making it a particularly appealing prize whenever the tribal fleets fight each other, as it has few weapons of its own to defend itself with.

Amethyst	39 pts
Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	10"	3"	4	5+	4+	-	2-4	Shield-5+, Vanguard-4"

Name	Arc	Att	Lock	DMG	Type	Special
Microwave Array	F/S/R	4	3+	1	E	Close Action, Scald-1

Encountered ships of the class: *Valley of Embers, Blood's Flow, Shade of Horus, Significant Fire*

The Amethyst class frigate is perhaps the most the most aggressive ship in the entire Shaltari arsenal and calls for only the most reckless captains with the greatest bloodlust to command. While most Shaltari vessels shy away from close action engagements (and thus they are not regarded for their close in killing power), the Amethyst embraces them. This puts the class at odds with most of the fleet, leading it to conduct very specific missions and highlighting its potency. Indeed, this rightly feared ship is probably the most dangerous close-action oriented frigate sized vessel yet encountered by the UCM, beyond even those of the Scourge.

It is armed with a terrifying microwave array, a cluster of weapons designed to do appalling damage to hull and flesh at close range. Its superheating beams are capable of melting through armour, frying internal components and causing reactors to rupture. There are even stories of a ship's crew being literally cooked to death through the apparent safety of bulkheads, their blood boiling from every orifice in agonising screams. Furthermore, being entirely energy based, these weapons ignore all point defences that would be raised against them.

Silicon	55 pts
Monitor	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	2"	4	4+	4+	-	1-3	Monitor, Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Quad Ion Cannon	F	4	3+	1	E	Crippling-Navigation Offline

Load	Launch	Special
Boarding Pod	1	-

Encountered ships of the class: *Euthaniser,Benevolent Mercy, Rio's Silencer*

Much as with the Scourge, monitors are an unusual fit in Shaltari fleets, due to their low speed and consequent lack of finesse. In addition, the Shaltari rarely fight defensive actions, making an ordinary monitor-type configuration superfluous. Instead, Shaltari types fulfil a rearguard role.

The most frequently seen is the Silicon class, armed with a quad-bank of tilt-able ion cannons, giant versions of those commonly found on Kukri grav-tanks. While these effectively damage ships in higher orbital layers, their true value is in disrupting the power systems of larger ships. This makes the Silicon especially favoured by the type to Starchief who likes taking prizes, or enjoys boarding actions against helpless foes, drifting helplessly in the void.

Selenium	51 pts
Heavy Voidgate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	2"	4	4+	4+	-	1-2	Descent, Gateship-3, Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Defence Array	F/S/R	4	4+	1	E	Escape Velocity
Charged Air	F/S/R	3	5+	1	E	Air to Air, Close Action

Encountered ships of the class: *Warchariot, Deadly Conjurer, Amulet*

Most Shaltari ground forces reach the surface via Voidgates - ubiquitous, unglamorous ships. Voidgates tend to be lightly armoured and unarmed, making them easy targets. However, as common as these vessels are, sometimes the Shaltari need to guarantee landings planetside, so rely on heavier ships. The Selenium class is one such vessel. It has the transference capacity of a Voidgate, and guns designed to fire out of atmosphere at starships. This allows the Selenium to defend the ground troops deployed through it.

These enhanced capabilities and much improved survivability over Voidgates makes the class particularly useful in the thick of heavy fighting, especially given the importance Shaltari place on their own lives. As a result, more of this class have been seen during the Battle for Earth than anywhere else.

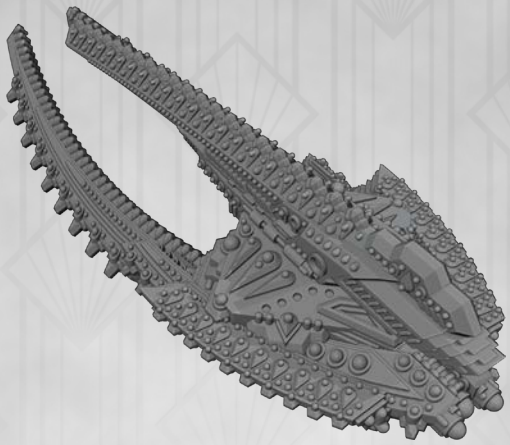

Strontium	54 pts
Monitor	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	2"	4	4+	4+	-	1-2	Monitor, Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Force Projectors	F/S	6	3+	1	K	Anti Wing, Close Action

Caesium	50 pts
Cutter	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
20"	8"	3"	3	5+	5+	-	1-3	Descent, Shield-5+, Vanguard-4", Vectored

Name	Arc	Att	Lock	DMG	Type	Special
Light Disruptor	FN	4	4+	1	E	Calibre-L

Encountered ships of the class: *Raa's Wings, Raa's Claw, Featherblade, Crimson Point*

Although smaller than some of the more typical Cutters employed by the UCMF, the Caesium is no less the archetypical design: fast, mobile, and excellent at hunting outlying enemy ships. The Caesium goes even further than those of lesser races by mounting a specialised version of the disruptor designed specifically for targeting small ships. This makes it a focused blade in the hands of any Starchief, a tool poised to eliminate very specific targets early in an engagement. Hilariously fast by human standards, even the Scourge cannot outrun them. Though physically fragile even by Shaltari standards, its energy shields may hope to repel any hapless return fire that manages to connect.

The Caesium's capabilities also make it an infamous privateer; lone and rogue Shaltari captains have been known to command packs of these lethal hunters to harass and exploit vulnerable targets for their mysterious ends, or just for the sport of it.

Gallium	55 pts
Bio-Hazard Cutter	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
20"	8"	3"	3	6+	4+	-	1-3	Shield-5+, Vanguard-4", Vectored

Name	Arc	Att	Lock	DMG	Type	Special
Bio Atomiser Array	F	3	3+	1	C	Close Action

Encountered ships of the class: *Bringer of Decay, Cleansing Flame, Inevitability, Fate's Instrument*

The Gallium is one of the most aggressive and insidious vessels the Shaltari possess. Based on a light, fast cutter hull, the Gallium's only weapon defines it: the Bio Atomiser Array, one of the most feared things to receive a hit from in the known universe, as far as the crew are concerned. On land, smaller versions of the technology vaporise living tissue though stone walls. Through thick starship armour over a massive area, the effect is more creeping. A hit will indiscriminately rupture living cells and build up static charge in fine micro systems. Over the course of a battle, the effect is a spectrum from vomiting blood to heart attacks, brain haemorrhage, short-circuits and catastrophic malfunctions.

The Gallium's typical mode of attack is to close rapidly with the target and fire early, maximising the effectiveness of the growing disruption over the battle. Such tactics are not for the cautious, so Galliums are typically crewed by a larger percentage of battle-hungry Firstborns than most Shaltari vessels.

Chromium	60 pts
Destroyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	5	5+	4+	-	1-3	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Disruption Beamers	F	3	3+	1	E	-
Thermal Lance Cannon	FN	2	2+	1	E	Burnthrough-1, Fusillade-2

Encountered ships of the class: *Novaqueen, Black Pulse, Long Certainty*

The Chromium class destroyer is unusual in that it features a thermal lance cannon, a weapon very similar to the Burnthrough weapons of more primitive races. Compared to some of the more eldritch armaments employed by the Shaltari, the simple expedient of focusing a sustained high energy laser at a target seems primitive. However, no UCMF admiral would deny the effectiveness of such weapons, often from personal experience!

Shaltari equivalents are of course more advanced, featuring shorter burn times and higher armour penetration potential. The fact that such a weapon can be mounted on a destroyer type hull in addition to other weapons is a testament to their advanced technology. However, the fact that these ships see more service with the smaller and less well equipped tribes suggests that such technology is simple for the Shaltari to construct ahead of more outlandish weaponry.

Iridium	63 pts
Destroyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	5	5+	4+	-	1-3	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Disruption Beamers	F	3	3+	1	E	-
Pulse Ioniser Bank	F	4	*	1	E	Burnthrough-2, Calibre-H/C Close Action, Mauler

Encountered ships of the class: *Cyan Seas, One Knowledge, Dread Soldier*

The Mercury class destroyer features an extremely rare weapon type known as the Pulse Ioniser. These weapons establish an energetic link with the target at close ranges, creating an ionised trail through which energy pulses can be passed, creating ever increasing devastation as long as the link is maintained. An unusual quirk of the weapon is that the potential power of the weapon increases in relation to the density of the target's armour, ensuring that nothing is safe from its onslaught.

This ability makes the Mercury class a superlative hunter of the heaviest armoured ships in an opponent's fleet, vessels often many times its size. As such, the class typically hunts in packs, using careful tactics and downed shields to close to lethal firing range with the foe. Such tactics make it a favourite with the youngest and brashest of Shaltari captains, individuals who have often only lived out a few lifespans and still have much to prove.

Cobalt	52 pts
Homeship	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	5	5+	4+	-	1-3	Shield-5+, Mothership

Name	Arc	Att	Lock	DMG	Type	Special
Disruption Beamers	F	3	3+	1	E	-

Load	Launch	Special
Dropships	2	-

Encountered ships of the class: *Guardian Will, Deathbringer, She Triumphant*

The Cobalt class homeship is essentially a smaller version of the more ubiquitous Emerald class mothership. Its only purpose is to physically convey Shaltari ground forces to the battlespace, from which they can be teleported to the surface via the Voidgate network.

The Cobalt is a faster, lower cost alternative to the Emerald best suited to smaller scale operations. Typically, they are employed when Starchiefs do not wish to or need to put large numbers of lives at risk on the frontline. With the Shaltari, superior technology and almost clairvoyant analysis of enemy dispositions and tactics frequently win the day over sheer numbers.

Nefertem of the Dawn – Invisible Light	81 pts
Heavy Destroyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	7	5+	4+	-	1	Cloak-2, Hero, Shield-5+, Stealth, Unique

Name	Arc	Att	Lock	DMG	Type	Special
Microwave Crescent	F	4	3+	1	C	Crippling-2xFire, Sustained Fire

Silent Shielding

This Group can have shields tokens while on Silent Running and does not lose shields tokens when going on Silent Running

Only ship of the class: *Invisible Light*

Stealth technology and camouflage in all its forms are abhorrent and dishonourable for most Shaltari, but Nefertem chose long ago to reject this notion. Her stance is that subterfuge and surprise attack are time-honoured, central tenets of battle and has chosen to master them. To that end, she commissioned a unique vessel.

Invisible Light demonstrates that, of course, the Shaltari are perfectly capable of matching or exceeding the Scourge in stealth technology if they so wish. Of heavy destroyer tonnage, this vessel's innocuous-looking additional frontal superstructure arms conceal this cloaking system as well as supporting the additional mass of its only weapons system. The thus-far unique Microwave Crescent is a long range, low-observable variant of typical microwave technology that can reach into the heart of any target, cooking its crew and delicate systems from the inside. Often, the victim has no idea where the burst came from and has little chance of returning fire.

Aquamarine	74 pts
Light Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	7	5+	4+	-	2-3	Shield-5+, Vanguard-6", Vectored

Name	Arc	Att	Lock	DMG	Type	Special
Gravity Coil Pair	FN	4	2+	1	E	Impel-2, Reave-1
Harpoon Cascade	F/S/R	3	4+	1	K	Close Action

Encountered ships of the class: *Aeons Asunder, Mirrored Gaze, Infinity Circle, Waxing Moon*

The Aquamarine class light cruiser shares the same basic hull and engine setup of its cousin the Azurite. As a result, this ship is just as blisteringly fast and capable in manoeuvre as its sister class, ensuring that it can weave through the battlefield to seek its target and bite at the soft underbelly of its enemy.

Unlike the more general purpose Azurite though, the Aquamarine has a very specific mission profile, possibly unique to the Shaltari and granted by its highly unorthodox main armament, the Gravity Coils. This pair of weapons emits a narrow beam of gravitic disturbance, dealing focused damage to the victim and playing havoc with its inertia. In turn, this allows the target to be re-vectored as the Shaltari wish, diverting thousands of tons of sharship as if it had been pushed by the invisible hand of a divine being. The Aquamarine therefore has a unique support role as it can repulse enemy ships from friendly ones or place them in an unfavourable position, ready for the Shaltari onslaught.

Azurite	70 pts
Light Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	12"	3"	7	5+	4+	-	2-3	Shield-5+, Vanguard-6" Vectored

Name	Arc	Att	Lock	DMG	Type	Special
Disruptor Pair	FN	8	4+	1	E	-
Harpoon Cascade	F/S/R	3	4+	1	K	Close Action

Encountered ships of the class: *Revenant, Azure Phantom, Twisted Fate, Twilit Eternity*

The Azurite is the most common type of light cruiser encountered during the Reconquest. Much like those of other races, this vessel is somewhat more susceptible to damage than full cruisers, although it gains an advantage in combat speed due to its lighter hull. The Azurite also has the rare advantage of beyond normal vectoring capabilities, allowing it to turn and fire with dizzying speed above what even most frigates are capable of. The makes it a highly dangerous and unpredictable opponent, especially when behind the lines where its lightning turning ability is at its most deadly.

It is armed primarily with a pair of disruptors. While far from harmless, these weapons have a constricted fire arc compared to the more destructive disintegrator weapons that fulfil the role of standard guns among Shaltari ships. However, their narrow arc is compensated for by the Azurite's superlative turning circle. It seems that these weapons were chosen for their lower power consumption, since the extreme manoeuvres the Azurite performs must surely consume vast amounts of energy.

Amber	96 pts
Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	1-2	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery	F/S	5	3+	1	E	Reave-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1

Encountered ships of the class: *Sands of Time, Cerulean, Sobek's Memory, Elder Warrior*

The Amber is the standard cruiser class in most Shaltari tribal fleets and is one of the most commonly encountered Shaltari capital ships. It is armed with a pair of disintegrator banks, each with the destructive power equal to a UCM Rio class' primary armament. When both banks can be fired, the Amber is one of the most dangerous conventionally armed cruisers in the conflict. Great age is frequently evident in the micro-scaring of the hulls of Amber class vessels which indicate that this design is one of the oldest in the tribal fleets.

Like almost all Shaltari warships, the Amber features an advanced all-encompassing energy shield which can be raised or lowered to suit circumstances, as well as point defence capabilities in excess of any equivalent from a less advanced race. The only downside of such systems is that they interfere with each other, and as a result both cannot be operated at once. These valuable lessons were learned the hard way by the UCM which has lost more ships to this particular class than any other in its history.

Granite	110 pts
Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	1-2	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Particle Lance Pair	FN	2	3+	2	C	Critical-2, Focused

Encountered ships of the class: *Sorrow, Aeon's Light, Mind's Eye, One True Ending*

The Granite class cruiser is a lethal predator of the void, configured specifically for hunting priority targets, marked for destruction in the early stages of battle. It is a highly reliable and predictable dealer of death, much like its heavier cousin the Obsidian class. The Granite offers superior speed and reduced cost, making it more practical for general use, especially against valuable smaller ships where use of an Obsidian would frankly be overkill. The Granite is also a better choice during advanced manoeuvres as when it cannot unleash all its weapons, it is the equal of the bulkier ship in firepower.

Both of its primary weapon hardpoints are occupied by a pair of particle lances, the same weapons which lend its larger cousin superlatively dependable damage dealing ability. This class is the most common capital ship to mount these weapons and is most often the first contact an unfortunate UCM captain will have with these weapons. That captain must learn quickly that armour is no protection and that evasive action is the only means of avoiding a cold, starlit grave.

Turquoise	90 pts
Cruiser	M /40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	1-2	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Ion Aura	F/S/R	6	3+	1	E	Close Action, Scald-2
Ion Storm	F/S/R	6	4+	1	E	Bombardment, Scald-1

Encountered ships of the class: *Stormcrow, Sundered Sky, Nomad, Tsunami*

The Turquoise class cruiser is a highly unusual vessel as it is designed for both close action assault against other ships as well as orbital bombardment and is equally as dangerous in both roles. It has no equivalent in the fleets of other races and opponents must judge this class on its own unique merits without familiar comparison. Its dual role lends it best to first wave sorties against defended positions, where shock and awe is at its most potent. Typically, the Turquoise will close at full speed with the enemy to destroy opposition immediately above a bombardment site before proceeding to lay waste to the surface. This also allows a single ship to enact this task rather than two, making best use of the Shaltari's small numbers.

Its unusual mission profile is facilitated by its armament – twin banks of ion storm generators. As with its more all-round and larger cousin the Jet class, these weapons can unleash savage waves of energy against both ships and surface targets at close distances. However, unlike the Jet it does not feature any other main armaments, making it a more focused tool for up-close and personal destruction.

Basalt	108 pts
Fleet Carrier	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	1	Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Disruptor Pair	FN	8	4+	1	E	-

Load	Launch	Special
Fighters & Bombers	2	-
Optional Launch		
Mines & Impel Mines	2	-

Minelayer

This ship may replace its Fighters & Bombers with Mines & Impel Mines for +4 pts.

Encountered ships of the class: *Limitless, Sanctity of Sekhmet, Verdant, Fatebringer*

The Basalt class fleet carrier is the Shaltari tribes primary launch vessel for strike craft such as fighters and bombers. As a dedicated carrier, it tends to operate towards the rear of an engagement, utilising the superior effective range of its charges to stay out of harm's way while inflicting appalling damage on the enemy. It also carries a reasonable ship-ship armament in the form of a pair of disruptors, allowing it to defend itself directly if called upon to do so.

While Shaltari bombers are undoubtedly dangerous, it's often the fighters than fulfil the most useful role within a tribal fleet. Since Shaltari point defence is inoperable when a ship's shields are up, they are often the only counter to enemy close action attack and enemy bombers, especially if they are able to close with the Shaltari and survive the approach. As such, the Basalt is crucial pillar around which many of the bloodiest engagements are planned – a powerful factor, since Shaltari fighters are some of the fastest and most potent known to mankind.

Emerald	106 pts
Mothership	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	9	5+	4+	-	1-2	Mothership, Shield-5+

Name	Arc	Att	Lock	DMG	Type	Special
Disruptor Pair	FN	8	4+	1	E	-

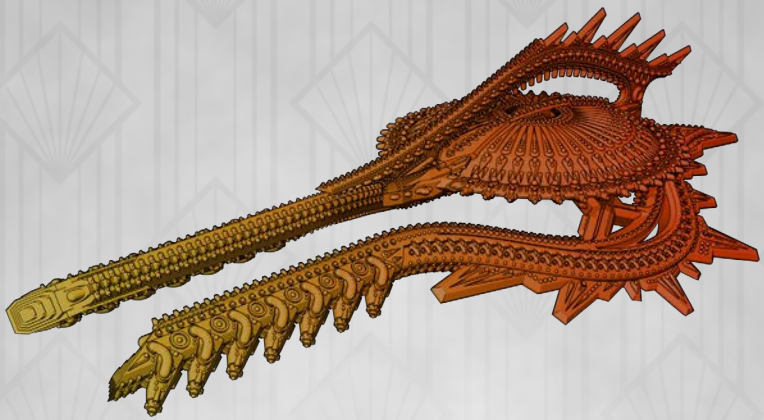

Load	Launch	Special
Dropships	4	-

Encountered ships of the class: *Infinite Dreams, Warhold, Kingdom of Osiris, Erie*

Motherships are a unique to the Shaltari and the Emerald is the most common class. In essence, they resemble the troopships of other races since they are cruiser sized and physically carry hordes of ground forces. This is where the similarity ends, as motherships use teleportation technology to route these forces to the surface via Voidgates and thus do not employ crude bulk landers. Voidgates are small ships that fulfil the role of strike carriers, operating in atmosphere some distance from the mothership. They do not carry troops physically but act as a fulcrum for teleportation. The Mothership is the primary source of power for this whole system but does not need to be positioned over the dropzone, keeping it further from harm.

Unlike troopships, motherships also carry a dropship equivalent (know as Gates) – small craft that are the final step in the chain before troops enter the battlefield itself. These materialise from the voidgates, fly to the dropzone and then ground units materialise from them. This complex system ensures that troops are never at risk in transit, preserving precious lives from defence battery fire.

Citrine	122 pts

Ion Storm	F/S/R	6	4+	1	E	Bombardment, Scald-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1

Encountered ships of the class: *Cobalt Shadow, Inviolate Centuries, Starpride, Pure Knowing*

The Jet class heavy cruiser is one of the most flexible available to the tribal fleets. It can be applied effectively to a variety of missions and situations with its varied fire options making it equally effective at orbital bombardment, close action attack or ranged ship-ship action. The skill in utilising this class, as demonstrated by its best and most ancient of captains, is to put it in a position where more than one of these offensive means can be brought to bear simultaneously. Unusually, this seems to be a new class, with the first sighting only a few years before the Reconquest began, indicating that Shaltari technology is still evolving, albeit at a slower pace than other races.

It is armed primarily with two banks of ion storm generators. These eldritch weapons generate waves of coruscating energy at close ranges and can be turned on ships (bypassing all point defences in the process) or on surface targets, lashing whole districts to rubble in seconds. For longer range ship-ship combat, the Jet is equipped with a single bank of disintegrators, which are normally used when closing in on the enemy with the combined fury with its other weapons.

Obsidian	130 pts
Heavy Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	3"	11	5+	4+	-	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Particle Lance Pair	FN	2	3+	2	C	Critical-2, Focused
Particle Lance	FN	1	3+	2	C	Critical-2, Focused

Encountered ships of the class: *Honour Above Death, Black Immortal, Future Path, Woemaker*

The Obsidian class heavy cruiser is one of the most feared ships in the Shaltari tribal fleets as it generally hunts the largest and grandest of prey. Crews of Obsidians take great honour in slaying opponents larger than themselves and many of the class' captains have been subsequently elevated to Starchief. Enemy flagships, carriers and battleships are frequently targets for the Obsidian's wrath, such is the concentrated nature of its awesome firepower.

It is armed with a trio of forward facing particle lances – weapons of focused fury able to slice through any known armour with preposterous ease. Since armour serves virtually no protection against these weapons, they are frequently turned on the toughest, best protected ships in an enemy fleet, where this advantage is most telling. The only downside to these weapons is their lack of ultimate damage potential, although they more than make up for this in their ability to cause harm in a highly predicable and reliable way, making the Obsidian an excellent choice when the odds of failure must be minimised.

Onyx	125 pts
Heavy Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	3"	11	5+	4+	-	1	Shield-4+

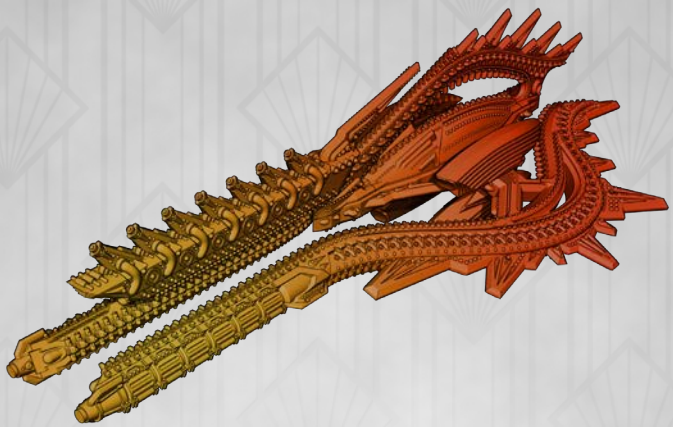

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery	F/S	5	3+	1	E	Reave-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1

Encountered ships of the class: *Unending, Folly of Death, Doomsayer, Scythe of Ages*

The Onyx class is the most commonly encountered Shaltari heavy cruiser type. Command of one is frequently the stepping stone to greatness for Starchiefs, since it offers all the awesome destructive power needed to score the choicest kills. Its hull is bulker than a standard cruiser, leading to greater resilience at the expense of speed. However, it is less tough than its equivalents from other races although it compensates for this small shortcoming with superlative scan range, advanced energy shields and fantastic point defence abilities when shields are down.

The Onyx is armed with three banks of disruptors. These energy based weapons are more dangerous than standard guns, albeit at the expense of more limited fire arc than turreted armaments. By far, the Onyx is at its most deadly when unleashing all three of these lethal batteries, although it cannot manoeuvre while doing so, making it best suited for action in the heart of the battle where targets are plentiful.

Seti Alpha Strike

Dropships deploying Battalions from this Ship do not use the Mothership and Gateship-X special rules and can be deployed to any orbital layer. When you deploy any of this Ship's Dropships to a Dropsite, Immediately remove that many enemy Battalions from that Dropsite.

Only ship of the class: *Spear of Anubis*

Seti the Kinslayer is an infamously treacherous Shaltari who loves nothing better than fighting and ending his own kind. With no better targets, annihilating the lesser races will do. He was originally known as a ground commander but has since been known to helm a unique, personal vessel of heavy cruiser tonnage: the Spear of Anubis. Unusually, and excessively, this ship packs two vast torpedo tubes, presumably to achieve kills in a most satisfying manner. Those are augmented by a spinal mounted thermal lance cannon. Inside, a small teleportation chamber allows Seti and his warriors to make planetfall whenever the impersonality of void combat bores him. He is understood to relish the smells of smoke, death, and blood.

Seti will attach himself to any tribe's campaign so long as it promises good sport for him, but given his reputation, any starchief that accepts his sword should be permanently nervous. If anything, this reputation has soured further in recent years after the Brazilian incident and his gleefully vicious actions over Aaru in 2678.

Mesolite	166 pts
Supercruiser	M / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	12	5+	4+	6+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Twin Hyperwave Cannon	F	4	3+	2	E	Crippling-2xFire

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *Black Pyramid, Aten's Chariot, Invader, Sun Queen*

While Shaltari battlecruisers are regrettably familiar, some of their latest, lightest derivatives are not. Classified as supercruisers, these ships appear to be brand new. The alien's choice to increase battlecruiser production and variety suggests a development, but whether that's the strain or war or simply innovation is unknown.

The first Shaltari supercruiser sighting, early in 2679, was the Mesolite. This svelte ship-killer is armed with a twin Hyperwave Cannon, matching the primary armament of the heavier Goethite class. It foregoes other capabilities though in favour of a mount for two stacked self-deploying surface instillations. These vary from the Stellargate, which brings starship-grade teleport technology to the surface, to the Electrowave Caster, a devilish weapons instillation capable of inflicting crippling damage on orbiting starships. The most awe-inspiring and outlandish is the Worldstrider – by far the largest known walker-type construct, thus far. This city block-spanning monstrosity smashes whole instillations beneath its six, tungsten-sheaved legs.

Natrolite	172 pts
Supercruiser	M / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	12	5+	4+	6+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery Pair	F/S	5	3+	1	E	Volley-2, Reave-1

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *Barque Solar, Doombringer, Ark Majestic, Blue Scarab*

Another recent addition to the 27th century battlespace is the Natrolite supercruiser. Much like its cousin, the Mesolite, this warship packs a battlecruiser-grade linked pair of disintegrator batteries for devastating firepower during flexible manoeuvres.

While it offers little else in weaponry, it makes up for this with a docking mount for two stacked self-deploying surface instillations. These have already proven deeply problematic to deal with and represent an increased willingness from the aliens to commit to medium, and even long-term, surface commitments in contested territory. Some suggest this may be in response to increased Bioficer incursions, possibly an attempt to sway the war to their exacting, unknowable ends before the new foe arrives in force.

Ruby	160 pts
Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	13	5+	4+	6+	1	Shield-4+, Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery Pair	F/S	5	3+	1	E	Volley-2, Reave-1
Particle Lance Pair	FN	2	3+	2	C	Critical-2, Focused

Encountered ships of the class: *Perpetual, Bringer of Final Death, Ages Scarlet*

The Adamant and Ruby class battlecruisers are potent vessels designed for maximum firepower in a fast, sleek package. Both classes are excellent interdiction vessels, superlative in the arts of flanking sweeps and the annihilation of enemy supply convoys behind the lines. They feature battleship-level firepower in a fast package which can keep up with cruisers, making them popular command ships for missions that require speed above toughness. However, they lack a battleship's ability to take punishment, requiring dexterity, restraint and opportunistic aggression in equal measure from their captains.

Of the two classes, the Ruby is more common, but both share the same armament and capability. Firstly, a pair of disruptor banks gives them the base firepower of an Amber class cruiser. Added to this is a pair of lethal particle lances – weapons which can slice through any armour ranged against them. Unlike cruisers, these battlecruisers can generate enough energy to fire the pair simultaneously during manoeuvres, making this ship more deadly than even heavy cruisers in extreme combat.

Sapphire	150 pts
Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	13	5+	4+	6+	1	Shield-4+, Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Ion Aura	F/S/R	6	3+	1	E	Close Action, Scald-2
Ion Storm	F/S/R	6	4+	1	E	Bombardment, Scald-1
Gravity Coil Pair	FN	4	2+	1	E	Impel-2, Reave-1

Encountered ships of the class: *Ra's Orb, Forever in Wisdom, Supreme*

The Palladium and Sapphire class battlecruisers are more specialised than their conventionally aggressive kin and were conceived for disruption and close-range engagements. Although both classes aren't commonly encountered, the Palladium is rarer than the Sapphire. Why this should be is uncertain, although the generally accepted theory is that the Adamant/ Palladium type hull is an ancient design no longer manufactured, having been superseded by the more recent Ruby/ Sapphire type.

These vessels rely on a pair of ion storm generator banks to inflict crippling damage – equally devastating in the close action or orbital bombardment roles. Their second main armament is a pair of gravity coils. These forward-facing constructs create a localised, deadly beam of gravitic disturbance, ripping chunks from hulls, crushing bulkheads under their own weight, and even changing the heading of a multi-thousand-ton warship, disrupting the battle plans of any foe.

Hematite	165 pts
Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	13	5+	4+	6+	1	Shield-4+, Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Quad Thermal Lance Cannon	FN	8	2+	1	E	Burnthrough-1, Bloom-1, Fusillade-4

Encountered ships of the class: *Pharaoh's Spear, Core of Thebes, Temple Blade, Bloodletter*

The Hematite is one of the most feared, newest Shaltari warships and earned that reputation in a few short weeks of the aliens' diversionary attacks over Shangri-La and Elysium. It presents the firepower of four Chromium class destroyers in a frontal cluster of Thermal Lance Cannons - directed energy, long-burn weapons equivalent to the lasers of more primitive races.

Hematites are preferred by Elder captains who relish the precision killing of a single, worthy foe. Being a battlecruiser, the Hematite is large but offers no other serious weaponry. In a one-on-one naval duel, there are few more terrifying opponents. Hastily issued UCMF combat doctrines dictate engagement preferably with squadrons of fast frigates, although ships that small are atomised in seconds if caught under the solar intensity of the quad Thermal Lance.

Goethite	195 pts
Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	12"	3"	13	5+	4+	6+	1	Shield-4+, Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Twin Hyperwave Cannon	F	4	3+	2	E	Crippling-2xFire

Load	Launch	Special
Fighters & Bombers	3	-

Encountered ships of the class: *Starheart, Wrath of Osiris, Closed Fist, Immolator*

The Goethite is a more conventional, multi-role battlecruiser compared to its cousin the Hematite. It has also emerged recently, suggesting this may be a newly developed series. Its primary armament is a twin Hyperwave Cannon - a gigantic offshoot of the microwave-based weapons dreaded by infantry. In fleet terms, its closest equivalent is the far smaller arrays carried by Amethyst frigates, but this matches the range of conventional guns. The effect of hyper-concentrated microwaves on the target is stunning - a superheated mass of core superstructure results, which over time simply melts through the guts of the target, often destroying it long after the Goethite has moved on to a fresh target.

The Goethite also carries a compliment of Shaltari fighters and bombers, providing flexibility in combat. Its captains often close to medium range, engaging large targets with the Hyperwave Cannons while dispatching smaller victims with waves of bombers.

Spinel	215 pts
Pocket Battleship	H / 50mm

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *Lance of Ra, Eons to Dust, Reducer, Star Hunter*

The other side to the alien's increasing battlecruiser production was the introduction in numbers of pocket battleships in late 2678. Based on the proven battlecruiser superstructure, these already dreaded ships bring the full firepower of regular battlecruisers plus additional durability and capability in exchange for raw speed.

These ships differ substantially from battleships though, being lighter but also often offering the ability to carry and launch self-deploying surface instillations. Although supercruisers present a more economical option to bring these to the battlefront, pocket battleships also offer the full firepower befitting their vast size. The Spinel, one of the more 'common' variants, packs the previously unknown combination of a twin Hyperwave Cannon and a pair of Particle Lances. Both systems provide the Starchief with superlative, front-facing killing power.

Painite	190 pts
Pocket Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	14	5+	4+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery Pair	F/S	5	3+	1	E	Volley-2, Reave-1
Ion Aura	F/S/R	6	3+	1	E	Close Action, Scald-2
Ion Storm	F/S/R	6	4+	1	E	Bombardment, Scald-1

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *I Cast Shadow, Enflamed Cloud, Your Night, Heaven's Spear*

Another of the Shaltari's latest pocket battleships, the Painite is configured largely for planetary assault. Its ability to launch self-deploying surface assets forms the foundation for this, but the addition of twinned Ion Storm batteries enhances this mission profile. With these, the Painite can bombard surface positions to support its landings or direct the weapons' coruscating energies against enemy vessels above the dropsite.

Packing the full firepower of a battlecruiser in addition to its surface deployment mount, the Painite also mounts a linked pair of disintegrator batteries for devastating firepower during flexible manoeuvres. In combination, these capabilities make the Painite a flexible, deadly foe, able to dominate the battlespace in orbit and on the surface in a way few vessels can match.

Euclase	220 pts
Pocket Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	14	5+	4+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Thermal Lance Cannon Pair	FN	4	2+	1	E	Bloom-1, Burnthrough-1, Fusillade-2

Load	Launch	Special
Fighters & Bombers	3	-

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *Bestride the Universe, Fate's Hand, Sublime Orbit, Sky Kraken*

The new Euclase class pocket battleship is among the alien's most powerful capital ships below full battleship tonnage. Offensively, it mounts twinned Thermal Lance Cannons. These forward-facing weapons are devastating enough, but once the Euclase is in an optimal firing position, the full might of the ship's cores can be focused though them, increasing firepower at the expense of manoeuvres.

Given the drain on the power matrix, the Euclase's other offensive capabilities are low drain launch options. A substantial fight deck accommodates swarms of fighters and bombers, while the vessel's enhanced superstructure permits the carrying of self-deploying surface assets. Against the Euclase, enemies of the Shaltari are safe nowhere.

Boracite	190 pts
Pocket Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	14	5+	4+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery Pair	F/S	5	3+	1	E	Volley-2, Reave-1
Thermal Lance Cannon Pair	FN	4	2+	1	E	Bloom-1, Burnthrough-1, Fusillade-2

Feature Carrier

When building your fleet, this Ship must be assigned two deployable features from the Shaltari Deployable Features list (duplicates are allowed) paying points for each. This Ship starts the game carrying those Deployable Features.

Encountered ships of the class: *Starlance, Journeyman, New Death, Portent's Handmaiden*

A sister class of the Euclase, the Boracite is configured for pure ship-ship combat through increased firepower. Here, the Euclase's launch bays are replaced with a linked pair of disintegrator batteries. Coupled with the twinned Thermal Lance Cannons, this ship is at its most deadly when its captain, who must possess time-honed skill, can manoeuvre into an optimal firing position prior to unleashing all weapons, pushing the ship's enhanced power matrix to the limit.

This killing power is supplemented by a standard feature, thus far, of all Shaltari pocket battleships – launch clamps for self-deploying surface assets. On the Boracite, these are often employed as launch and forget assets while en-route to the next kill, although if targets are plentiful, the Boracite may remain on station of unleash salvos of annihilating energy at its foes.

Diamond	230 pts
Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Void's Needle, Claw of Anubis, Bloodlust, Lord of Slaughter*

The Diamond Class battleship is a truly frightening spectacle. Stretching 1546 meters in length, this mighty vessel is one of the largest known battleships and an imposing figurehead for any fleet. Despite their rarity, more UCMF officers ranking Admiral or above have met their deaths at the hands of one of these leviathans than any other type of ship in the Reconquest. This has caused many to speculate that the aliens use them to specifically hunt flagships, or simply that their captains treat the slaying of an opposite number as the highest achievement, such as it can be when fighting humans.

In addition to a pair of disintegrator banks, the Diamond class' primary armament is a triad of super particle lances. These vast weapons extend through half the ship's entire length and are fixed in the forward arc, such is their unknowable mass. These monstrosities have the ability to scythe through any armour like butter, their beams frequently passing right through a capital ship. While their damage dealing ability is potent, their real strength lies in reliability – the certainty that the enemy will feel the Diamond's wrath, no matter how well protected it is.

Platinum	265 pts
Supercarrier	H / 50mm

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Aten, Crimson Monolith, Eternal Nightfall, Ancient Solace*

The Platinum Class shares the same basic hull design as the Diamond class, but its internal space and vast upper levels are dominated by an enormous flight deck, making this vessel a supercarrier by UCM reckoning. The Platinum class can unleash swarms of fighters and bombers in an unstoppable tide of destruction, in volumes and quality that few other ships can match. In addition (and like its cousin the Diamond) it also serves the secondary function of mothership, carrying a small number of ground troops to supplement surface landings.

Ships of this class are among the most ancient vessels ever encountered by mankind. Indeed, the very first non-human ship to make contact with humanity on the now famous exploration frigate Endurance was the Platinum class Supercarrier Aten. During the then cordial relations between Shaltari and Human, the Starchief at the helm of the mighty ship proudly proclaimed that it was over 7000 Earth years of age, and that was well over 300 years ago. Their continued survival over the millennia is due in part to their scale, but mostly to the extended combat range granted by its strike craft, ensuring that finally ending one of these behemoths is a challenging task in the extreme.

Gold	270 pts
Supercarrier	H / 50mm

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Golden Chariot, Orb of the Sun, Ark Resplendent, Ra's Gaze*

Like the Bronze and Silver class battleships, the Gold class supercarrier is a relatively new and scarce sighting. Since none of these classes were recorded before 2672, it is assumed they are newly laid down, but with the Shaltari, things are seldom as they seem.

Unlike the familiar Platinum class, the Gold is a far more aggressive vessel, since it mounts the powerful, close-action microwave arrays of its sister classes. Also armed with the Ion Cannonade, the Gold is a terror to almost any vessel, and that's before its swarms of formidable Shaltari bombers strike. Certainly, the Gold is one the Shaltari's premier assets and a worthy chariot for the mightiest of attack-oriented Starchiefs.

Silver	240 pts
Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Obliterator Cannon	F	4	3+	2	C	Bloom-2, Critical-1, Focused
Microwave Array Bank	S	5	3+	1	E	Close Action, Scald-1, Volley-2
Gravitic Beamer (Leading)	F/S	6	4+	1	C	Alt-1, Calibre-L/M, Impel-2, Re-Entry
Gravitic Beamer (Trailing)	F/S	4	4+	2	C	Alt-1, Arrest-3, Calibre-H/C

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Tarnisher, Forsworn Fortune, Glassheart, Mortality*

Closely related to the Bronze, the Silver class battleship also features a broadside microwave array and a prow-mounted Gravitic Beamer, but replaces the Ion Cannonade with the spectacular Obliterator Cannon. This massive weapon's capacitance prongs take up nearly half the ship's length. These generate a cracking flow of unstable, rare particles then channel them through a small emitter nozzle at the unfortunate target. For a Shaltari weapon, It is uncharacteristically random in its destructive power due to exactly how this torrent of particles interacts with its target. In the worst cases, they burrow through a ship like lightning through jelly, annihilating ordinary matter in their quest not to exist. Such a strike can cripple even another battleship, so only the most foolhardy captain would bank on a hit dissipating harmlessly around their ship's hull. Although most Starchiefs may be considered shrewd operators, those that command the Silver class may have an insatiable, gambler's mindset.

Bronze	215 pts
Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Ion Cannonade	F	10	3+	1	E	Crippling-Navigation Offline, Reave-1
Microwave Array Bank	S	5	3+	1	E	Close Action, Scald-1, Volley-2
Gravitic Beamer (Leading)	F/S	6	4+	1	C	Alt-1, Calibre-L/M, Impel-2, Re-Entry
Gravitic Beamer (Trailing)	F/S	4	4+	2	C	Alt-1, Arrest-3, Calibre-H/C

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Great Vex, Brazen Khopesh, Elemental, Eternal Master*

Although many Shaltari ships can be considered unusual, the Bronze class battleship is especially so. At the prow, it mounts the fearsome Ion Cannonade - two vast rows of ion weapons with an excessive rate of fire. Like all ion weapons, these can cause havoc to a ship's power systems before battering it to shreds with a hail of energy pulses. On the ship's back, it mounts a Gravitic Beamer. While damaging enough on a basic level, this weapon's real threat comes from its effectiveness against ships in atmosphere and its tendency to literally shove ships forward, often into unfortunate places. Lastly, the ship mounts twin broadside crescents of microwave emitters for close-in killing power.

Unlike other, more focused battleships, this class requires a Starchief with flexible cunning to achieve its maximum lethality while frustrating enemy operations.

Copper	200 pts
Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special

Torpedo	2	Limited-4
Bulk Landers	2	-
Fighters & Bombers	6	-

Drive Augmentation

This Ship may take a Drive Augmentation for +35 points, increasing its Thrust by 3".

Encountered ships of the class: *Inspiration, Forgeheart, Dreadcloud*

The Iron class supercarrier is a formidable vessel designed for lone surface incursions. While its conventional armament is minimal, its cavernous hold contains swarms of fighters, bombers, and rare Shaltari launch assets. Bulk landers give the aliens an atypical deployment method requiring no support vessels while advanced torpedoes obliterate any responders.

Actinium	245 pts
Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	4"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Gravitic Beamer (Leading)	F/S	6	4+	1	C	Alt-1, Calibre-L/M, Impel-2, Re-Entry
Gravitic Beamer (Trailing)	F/S	4	4+	2	C	Alt-1, Arrest-3, Calibre-H/C
Electrosurge Projectors	B	4	4+	1	E	Status, Volley-2

Encountered ships of the class: *Diplomat, Aaru-born, Our Distain*

The Actinium is a supremely challenging and disruptive opponent. It's broadside Elecrosurge Projectors are designed to lash a ship's core systems with pulsed directed energy surges, while its Gravitic Beamer crushes and shoves thousands of tons of enemy starship with localised hypergravity.

Lanthanum	285 pts
Super Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	6"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Particle Lance Triad	FN	3	3+	2	C	Critical-2, Focused
Mega Thermal Lance Cannon	FN	6	2+	2	E	Burnthrough-2, Bloom-2, Focused
Electrosurge Projectors	B	4	4+	1	E	Status, Volley-2

Encountered ships of the class: *Spear of Ra, Sunbringer, Kinslayer*

The Lanthanum is a predatory flagship killer. Featuring twice the spinal mounted mega-weaponry found on the already formidable Diamond, this super battleship burns through any foe with Thermal Lance and Particle Cannons while its broadside Electrosurge Projectors wreak havok with surrounding opponent's core systems.

Cerium	230 pts
Super Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	6"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Mega Thermal Lance Cannon	FN	6	2+	2	E	Burnthrough-2, Bloom-2, Focused
Microwave Array Bank	S	5	3+	1	E	Close Action, Scald-1, Volley-2

Load	Launch	Special
Torpedo	2	Limited-4

Encountered ships of the class: *Starbringer, She Immolates, Nova Sublime*

Shaltari torpedoes are extremely rare, and many would assume that such gargantuan, physical munitions are primitive for such an advanced race. However, when these technological marvels near their target, they detonate as a tiny supernova, channelling that colossal energy into a beam of incandescent power, liquifying the target. The Cerium carries four in two tubes, a cruiser-sized Mega Thermal Lance Cannon, and microwave broadsides.

Thorium	305 pts
Super Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	12"	6"	18	4+	3+	5+	1	Shield-4+

Name	Arc	Att	Lock	DMG	Type	Special
Obliterator Cannon	F	4	3+	2	C	Bloom-2, Critical-1, Focused
Electrosurge Projectors	B	4	4+	1	E	Status, Volley-2
Harpoon Deluge	F/S/R	8	4+	1	K	Close Action

Load	Launch	Special
Bulk Landers	2	-
Fighters & Bombers	6	-

Encountered ships of the class: *Void Chariot, Blade of Anubis, Dark Scarab*

Perhaps the most flexible of the Shaltari's dreaded super battleships, the Thorium offers Starchiefs an array of lethal firepower. Its prow-mounted Obliterator Cannon does as its name suggests, while broadside Electorsuge Projectors wreak havoc with any foe's ability to fight. A substantial launch compliment augments this leviathan's powers while swarms of rare Shaltari bulk landers allows surface incursions without support from voidgates.

Plutonium	435 pts
Dreadnought	C / 60mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	14"	8"	22	4+	3+	5+	1	Mothership, Shield-3+

Twin Particle Lance Turret	F/S	2	3+	2	C	Critical-1
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Harpoon Deluge	F/S/R	8	4+	1	K	Close Action

Load	Launch	Special
Dropships	4	-

Encountered ships of the class: *Aztec King, Mongol Heart, Cheyenne Supreme, Blade of Infinity, Deathstone*

The Plutonium is the largest vessel employed by the enigmatic Shaltari. Incredibly rare, opponents are seldom left alive to pass on intel. Sleeker than crude equivalents, their energy shields and scanners are peerless, and their vast array of weapons lethal.

Only the grandest individuals command such mighty ships: supreme tribal leaders often utilise a Dreadnought as their mobile court. Given their capacity for surface troops, a Starchief may wage an entire campaign personally with almost no support, should they will it.

Uranium	410 pts
Dreadnought	C / 60mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	14"	8"	22	4+	3+	5+	1	Mothership, Shield-3+

Name	Arc	Att	Lock	DMG	Type	Special
Pulse Ioniser Battery	F	12	*	1	E	Burnthrough-2, Calibre-M/H/C Close Action, Mauler
Microwave Array Turret	F/S	5	3+	1	C	-
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Disintegrator Battery	F/S	5	3+	1	E	Reave-1, Volley-2
Harpoon Deluge	F/S/R	8	4+	1	K	Close Action

Load	Launch	Special
Dropships	4	-

Encountered ships of the class: *Jade Pyramid, Mayan Fury, Mighty Amazon, Trophy Hunter*

The Uranium attracts the most warlike Starchiefs, concerned with the honour and satisfaction of closely witnessing the demise of their foes. Famously, Seti the Kinslayer once captained the Spear of Anubis, his hyper-aggressive tactics leading to its loss against the UCMF Triumph (after obliterating twelve cruisers).

The Uranium class features multiple close-action systems: primarily, a battery of six pulse-ionisers, particularly deadly to capital ships. Its microwave turret and Harpoon Deluge rounds off this fearsome range of killing tools.
