UCM Abilities

Famous and Faction Admirals may take additional Abilities from the following table when building your lists. Each Famous and Faction Admiral will state the amount of additional Abilities they may take. You can only take each Ability once per list.

Cost	Effect
1AP	**Aerobraking:** At the start of a friendly Group in Orbit's activation, that Group may move up to the maximum distance allowed by its Order this activation. At the end of its activation, it is moved into Atmosphere. Ships of L, M, and H Tonnage do not take damage due to Atmosphere this activation. Ships of C Tonnage only take 1D3 damage due to Atmosphere this activation instead.
1AP	**Intensify Point-Defence:** At the start of the asset phase, pick one friendly Group. Until the end of the round, Ships in that Group cannot be affected by Saturation Fire and may re-roll Energy and Kinetic saves of a 1 when rolling to save against Torpedoes and Mines.
2AP	**Infiltrate and Sabotage:** At the end of the Planning Phase, pick one Dropsite within 6" of a friendly Group. That Dropsite takes D3+1 Core hits.
2AP	**Mass Driver Volley:** When you assign a "Mass Driver" Weapon System to targets, that Weapon System improves its Lock by 1 for that attack sequence. If that Weapon System already has a Lock value of 2+, it causes criticals on a result of a 3+ for that attack sequence instead.
1AP	**Atmospheric Bombing Run:** At the start of the Asset Phase, target one friendly Wing of Bombers. That Wing reduces its Thrust by 2" and gains the Bombardment special rule until the end of the round.
2AP	**Next-Gen Armour Plating:** At the end of the Planning Phase, target one friendly Group. That Group may re-roll failed Energy Saves until the end of the round.

UCM Admirals

UCM Captain

Admiral Level 1 – 25 pts

Cost	Effect
*	This Admiral may take 1 additional Ability from the UCM Abilities Table.
1AP	**Interceptors:** When a Wing of enemy Bombers are placed or moved into based contact with a friendly Ship, before they attack, choose a Wing of friendly Fighters within their Thrust of the friendly Ship. Move any number of Fighters from that Wing into base contact with the Friendly Ship, then remove the moved Fighters and that many enemy Bombers. Fighters moved this way cannot ignore intervening Scenery for any reason.

UCM Rear Admiral

Admiral Level 3 – 65 pts

Cost	Effect
*	This Admiral may take 1 additional Ability from the UCM Abilities Table.
2AP	**Overcharge Lasers:** When you assign a Group's weapons to a target, pick one of the attacking Group's Weapon Systems with "Laser" in its name. That Weapon System gains Fusillade-2 for that attack sequence.
2AP	**Push Engines to Max:** At the start of a friendly Group's activation, each Ship in it suffers 1 Damage and improves its Thrust by 2" until the end of its activation.

UCM Launch Assets

Load	Thrust	Att	Lock	DMG	Type	Special
Light Torpedo	6"	2	2+	2	K	Penetrator
Medium Torpedo	6"	4	2+	2	K	Penetrator
Heavy Torpedo	4"	8	2+	2	K	Penetrator
Bombers	10"	2	3+	1	K	-
Heavy Bombers	8"	2	3+	1	K	Calibre-H/C, Penetrator
Mine	4"	2	2+	2	K	-

Load	Thrust	Re-rolls
Fighters	13"	1

UCM Deployable Features

PTS	Type	ES	KS	Hull	Special
5	Aegis Platform	3+	3+	4	Aegis-4

Each friendly Aegis Platform counts as a separate friendly Group for the purposes of its Aegis-X special rule. While this feature is deployed to a Dropsite, friendly groups treat the Dropsite as if it were a friendly Ship with Aegis-4 on the same Orbital Layer for the purposes of enemy close action and bomber attacks.

This Feature's Aegis special rule affects friendly Ships in Orbit in addition to Atmosphere.

After enemy assets end their movement within 4", are placed within 4" of, or are deployed to this Dropsite, roll a dice for each of those assets. For each result of a 5+, remove one of those assets. Enemy Features are only removed on a result of a 6+. Only one Aegis Platform can be used this way for each Asset and any Battalions already on the Dropsite are ignored.

PTS	Type	ES	KS	Hull	Special
10	Comms Platform	5+	5+	4	-

While any Dropsites have a friendly Comms Platform deployed to them, friendly Ships on the table with the Command Ship-X special rule improve the X value of that rule by 1 when generating AP.

Friendly Ships within 8" of this Feature's Dropsite ignore the effects of any Scanners Offline token.

PTS	Type	ES	KS	Hull	Special
20	Torpedo Platform	5+	5+	4	-

Load	Launch	Special
Medium Torpedo	1	Limited-4

When an attacking Group or Asset's attack would cause this feature to be removed, if it has any remaining Torpedoes, the attacking opponent may remove one additional Feature and any Battalions assigned to it from this Dropsite.

Tayne – Warsaw	155 pts (45 + 110 pts)
Famous Admiral Level 2 & Heavy Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
7"	6"	6"	12	4+	3+	6+	1	-

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser Pair	FN	8	3+	1	E	Burnthrough-2, Flash-2, Focused
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Stressful Manoeuvre

When firing its Cobra Heavy Laser Pair, this Admiral's Flagship may suffer 1 point of damage to change the Arc of its Cobra Heavy Laser Pair to F.

Cost	Effect
*	This Admiral may take 1 additional Ability from the UCM Abilities Table.
2AP	**Close Quarter Battle:** When a friendly Group moves, each ship in it suffers 1 point of Damage and gains Vectored until the end of the round.

Commodore Tobias Tayne is one of the UCMF's rising stars. An aggressive admiral that has seen through many engagements in command of one of the original run of Warsaw Heavy Cruisers. He played a pivotal role in the defence of Ferrum from the Scourge's surprise attack; his Battlegroup protected half a continent from Scourge attack and ensured the safety of several important Ferrum Motors factories.

Despite his valiant efforts, his original Warsaw, the Aurum Eyes was irreparably damaged and consigned to scrap. For his efforts he was given a promotion to Commodore and assigned a new ship. Retaining most of his original crew, they settled into this latest-gen cruiser, the Aurum Eyes II.

Having spent the battle over Ferrum pushing the Aurum Eyes to its absolute limit and beyond, Tayne and his crew know exactly what the class is capable of. Due to this, they're a lot more willing to push the ship to the point just before structural failure to ensure their Cobra Lasers have the enemy in their sights.

Weaver – Perth	210 pts (65 + 145 pts)
Famous Admiral Level 3 & Battlecruiser	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	8"	6"	14	4+	3+	6+	1	Vanguard-6"

Name	Arc	Att	Lock	DMG	Type	Special
Viper Super Heavy Laser	FN	9	3+	1	E	Bloom-1, Burnthrough-1, Flash-1, Focused
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Jink

At the start or end of this Flagship's movement, you may place it up to 2" away on a line drawn directly through the centre of both side arcs. If this Flagship is on the Max Thrust Special Order, you may place it 4" along that line instead.

Cost	Effect
*	This Admiral may take 1 additional Ability from the UCM Abilities Table.
2AP	**Laser Bombardment:** When you assign targets to a weapon with "Laser" in its name and an Arc of FN, that weapon gains Bombardment for that attack.

Admiral Weaver is never a name that the UCMA want to hear is backing them up. No fewer than 6 times they have required ground forces to make a mass, emergency extraction from an AO. Many Commanders believe that Weaver is a destructive maniac, levelling precious cities instead of letting ground forces do their thing. To an extent, that's true.

While Weaver delights in ridding worlds of Scourge occupation and reducing their fleets to molten slag, the destruction of historically important sites always pains them deeply. Weaver is an avid historian, especially of golden age architecture. Prior to their enlistment they were on track to finish their masters degree at one of the most prestigious universities on Aurum. However, during the build-up to the Reconquest they felt it was part of their duty to reclaim their heritage before the Scourge ruin it forever.

Now they seek to excise the corruption that are the Scourge. Using their Perth's laser like a precision scalpel, they burn away Scourge strongholds, glassing the parasites and everything around them. Their Flagship, Nicolum's Wrath has been in service since the start of the reconquest and has an impressive kill count. Despite this it's remained relatively undamaged throughout all its engagements. Thanks to minimal crew attrition, the officers are keenly aware of the limits of the ship and routinely use what other crews would call "aggressive evasive manoeuvres" to line up the perfect shot.

Havelock – New York	320 pts (85 + 235 pts)
Famous Admiral Level 4 & Battleship	H / 50mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
6"	10"	10"	20	4+	3+	5+	1	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Load	Launch	Special
Medium Torpedo	1	Limited-2
Fighters & Bombers	5	Alt-1
Heavy Bombers	3	Alt-1

Tip of the Spear

At the start of the game, choose one of your deployment zones or a single board edge. While this Ship is further than 12" away from the chosen deployment zone or board edge, you may re-roll its failed Backup Saves. This Ship may take a Drive Refit for +45 points, increasing its Thrust by 3". This ship cannot take a Laser Refit.

Cost	Effect
*	This Admiral may take 2 additional Ability from the UCM Abilities Table.
2AP	**Ballistic Prediction:** When you assign a Group's weapons to a target, pick one of the attacking Group's Weapon Systems with "Mass Driver" in its name. That Weapon System improves its Lock by 1 for that attack sequence.

Famous for her ice-cold head and killer instinct, June Havelock, 39, is the youngest admiral in the UCMF. Credited with spearheading the assault on D-Day—Earth from her battleship Carpe Noctum, she scored the most crucial kill of the day: the Scourge super-dreadnought Darkheart. One of the leading admirals of Battlefleet Sol, she regularly deputises supreme command above Earth. Thus far, Grand Admiral Halsey's respect and patronage has not been misplaced.

Havelock climbed far, quickly. At the outbreak of the Reconquest, she was a lowly Lieutenant Commander aboard the cruiser UCMS Regalia, and was deemed competent if unspectacular. While the fires of war have never yet taken her head, the crucible of combat has forged her. Forced to take command of the crippled Regalia on D+3—Eden, Havelock successfully rammed the Scourge battleship Sorn's Nemesis, destroying her and emerging as the only officer commanding to survive a ramming action that year.

Today, she is one of the most decorated officers in the fleet and one of a handful to have been present at over four D-Days. Although she commands from a carrier-type battleship, she is noteworthy for her gunnery skills, since she values skilled crew in that area in particular.

"Granite" Halsey – Washington	635 pts (105 + 530 pts)
Famous Admiral Level 5 & Supercarrier	C / 60mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
6"	12"	14"	24	3+	3+	5+	1	Aegis-6, Command Ship-2, Reinforced Armour

Name	Arc	Att	Lock	DMG	Type	Special
UF-9000 Mass Driver Turrets	F/S	2	2+	2	K	Critical-1, Penetrator, Volley-2
UF-4200 Mass Driver Turret Battery	F/S	10	4+	1	K	Fusillade-5, Volley-2
Leviathan Missile Bays	F/S	8	3+	1	K	Close Action

Load	Launch	Special
Fighters & Bombers	8	Alt-1
Heavy Bombers	4	Alt-1

Fighter Command

Fighters, Bombers, & Heavy Bombers launched from this ship may be placed up to 8" away instead of 6".

Cost	Effect
*	This Admiral may take 3 additional Abilities from the UCM Abilities Table.
3AP	**Master Tactician:** At the end of this Group's activation, discard a Pass Token and target another friendly Group of L or M Tonnage. If you do, that Group may turn up to 45 degrees, then move up to a quarter of its Thrust, and then each Ship in it may attack with a single weapon.

Head of the most powerful institution mankind has ever known, Supreme Admiral Jacob 'Granite' Halsey is famous for his steely, brisk, borderline-offensive, flare. His rank grants him a permanent seat on the High Council, but his record there is of extensive truancy, not that anyone dares raise that. A career-sailor, his career began as a teenage rating aboard the ageing grand battleship UCMS Virginia, which he would, thirty-two years later, captain. His remaining on the bridge to the last as the venerable ship was wrecked by Shaltari privateers earned him a promotion to commodore, along with facial scarring and a lifetime's hatred for the 'filthy rotten stinking echidnas'. After another two decade's service as the UCMF's most battlehardened, pre-Reconquest commander, he attained mastery of the entire UCMF.

Preferring to lead from the front, Halsey was present in the opening hours of the Battle for Earth, where, for the ninth time in his career, he had his CIC destroyed around him. Forced to command from the Shield of Aurum's auxiliary CIC, he remained a pivotal force in that titanic engagement, personally scoring nineteen capital ship kills in the first forty-eight hours.

Halsey is a fixture on whichever frontline is hottest, and although he's burst some more blood vessels on his pockmarked face, he's at the razor's edge of command.

Santiago	23 pts
Corvette	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
14"	6"	2"	2	5+	5+	-	2-4	Descent, Rare

Name	Arc	Att	Lock	DMG	Type	Special
Stingray Missile Bays	F/S/R	4	3+	1	K	Air to Air, Close Action

Famous ships of the class: *Jolly Roger, Queen Anne's Revenge, Flying Dragon, Golden Hind*

The Santiago class corvette is a small, atmospheric-capable vessel of sub-frigate tonnage. These nimble, fast ships were designed for a single purpose - hunting down enemy atmospheric fleet assets. They are armed with a potent array of air-to-air missiles, utterly lethal to the frigate sized vessels that are its favourite prey. In particular, strike carriers and their precious cargo are prime targets since these strategically vital ships are shielded from the majority of enemy fire while operating in atmosphere.

Santiagos are favoured by the most aggressive captains fresh from Niccolum's Naval Academy. Atmospheric combat is not for the faint of heart as it must be fought only at close range where the small Santiago is always vulnerable to return fire. The uniquely challenging nature of these operations is a fiery crucible from which many budding captains do not return, but those that do are often destined for greatness in the future.

Lysander	36 pts
Stealth Lighter	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
12"	6"	0"	2	6+	6+	-	2-4	Descent, Cloak-1, Rare, Vanguard-7"

Name	Arc	Att	Lock	DMG	Type	Special
Barracuda Missile Bays	F/S/R	2	4+	1	K	Close Action

Load	Launch	Special
Dropships	1	-

Surgical Strike

When you deploy Battalions from this Group to a Feature that does not contain any enemy Battalions, you may have each Battalion deployed to that Feature inflict it 1 damage before being placed.

Famous ships of the class: *Hope's Spark, Blue Shade, Eternal Darkness, Azure Night, Leprechaun, Silent Blade*

The Lysander class Lighter has been a lynchpin in the UCM's covert ops since it entered service in 2669. It is the UCMF's first fully cloaked warship, pushing multiple 1st gen classified stealth systems to their current limits of scale. The class is equipped for extended infiltrations including limited surface landings to scout potential invasion sites and support Resistance groups.

Initially the class was Level-6 classified and generally reserved for Marine Force Black - the UCM's most elite troops under the Office of Naval Intelligence. Rumours circulated among the admiralty, where demands for access to such a tool grew from whispers into shouts. As the Battle for Earth loomed, the Lysander's existence was confirmed and production ramped up. While still precious assets, limited numbers are now available to support regular frontline operations and first strike incursions.

Toulon	30 pts
Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	3"	4	4+	3+	-	2-4	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret Triad	F/S	3	4+	1	K	Fusillade-2

Famous ships of the class: *Drake, Levant, Constellation, Titania Sunrise*

The Toulon class frigate is the standard combat frigate of the UCMF and has been for many years. This class has been the first command of many successful captains, making it an ideal posting for the young and ambitious. It was the first class to use the familiar hull design now utilised in most colonial frigates and has been perfected over many decades. It is a dependable, cost effective vessel with reasonable firepower for its size and is more than capable of taking on its equivalents in enemy fleets. When deployed in numbers this unglamorous class can take on the largest of opponents.

The Toulon is armed with nine UF-2200 'Foe Hammer' mass drivers in triple turret configuration, giving it excellent all round targeting capability and flexibility. These turrets are standard on almost all UCM frigates, offering excellent dependability and common parts, following the efficient design doctrine of the Colonies. The UCMF has close to 400 of these mainstay ships in its register, making it an essential part of the Colonial Fleet for many years to come.

Taipei	37 pts
Missile Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	3"	4	4+	3+	-	2-6	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-
Piranha Missile Turrets	F/S	6	4+	1	K	Close Action

Famous ships of the class: *Surprise, Undaunted, Assasin's Blade, Blackjack*

The Taipei class missile frigate is a dedicated close assault vessel, designed for first wave attacks, flanking operations and supply interdiction missions. The class excels at bringing firepower to bear that belies its small size at the expense of range. As such, the Taipei must use its superior speed to attain close action range before it can strike with the full force of its Piranha missile system. Its attacks can be blocked by point defence so this class is most potent as a pack hunter, where the sheer volume of munitions can overcome these measures. It is also adept at hunting smaller vessels and non-combat ships, which often feature inferior point defence capabilities.

Such an offensive mission profile clearly suits the bravest of captains who are ready to take risks and happy to operate far from the main fleet. Such attributes are necessary as regrettably, survival rates for the Taipei class are among the worst of all UCMF ships. The repair docks of Niccolum are littered with Taipei's sporting horrific damage that have limped back to safety in defiance of all odds.

Jakarta	42 pts
Aegis Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	3"	4	4+	3+	-	1-2	Aegis-2

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-
Aegis-V Array	F/S/R	4	3+	0	E	Anti Wing, Close Action, Fusillade-2

Famous ships of the class: *Aegis, Shield of Ferrum, Congress, Noble Squire*

The Jakarta class aegis frigate was designed solely for close protection and escort missions around larger ships. While it is equipped with minimal offensive firepower, its real value comes from an impressive array of Aegis-V point defence lasers that equal those on much larger vessels. Crucially, the Jakarta can lend this protection to other ships, guarding them from enemy close action fire and bomber attack. As a high speed frigate, this shield can be directed to where it's needed, increasing efficiency and reducing redundancy. Since Scourge close action weapons are frighteningly effective, the development of this class was a priority from the early planning stages of the Reconquest.

Jakartas tend to attract solid, reliable captains that prefer to work towards the greater good with the minimum of self-aggrandisement. This is just as well, as opportunities for personal glory are few and far between on such a defensively-oriented class. However, the Admiralty recognises these qualities in a ship's captain and after a few tours, such leaders may graduate to the command of a troopship or a high level posting in logistics, where a level-headed team player is prized above any firebrand.

Lima	40 pts
Detector Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	3"	4	4+	3+	-	1-2	Detector, Rare

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-

Famous ships of the class: *Pharos, Guiding Light, Nostradamus, Virgil*

The Lima class frigate is equipped with an extremely potent electronic warfare suite and detector array. Its highly focused mission parameters revolve around active scanning the engagement zone for enemy presence and assisting in accurate target acquisition for the main fleet. The presence of Lima's in a UCM formation can increase the effective range of the entire fleet, providing the crucial opportunity of hitting first.

Unfortunately, these systems proved costly and slow to produce during the Lima's construction, greatly limiting the numbers available at the launch of the Reconquest. As of 2672, only 97 are in the register, making it a precious asset given its usefulness. Admirals are under orders to preserve these ships as much as possible and are usually given limited access to the class. Fortunately, it operates best from the rear of any fleet action, giving it a good chance of survival in most engagements.

New Orleans	42 pts
Strike Carrier	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	3"	4	4+	4+	-	1-2	Descent

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-

Load	Launch	Special
Dropships	1	-

Famous ships of the class: *Avenger, Aurum's Grace, Ocean, Everblade*

The New Orleans class strike carrier is a first wave planetary assault vessel designed to deliver ground troops to hot combat zones. The class is a mainstay of almost all UCM fleets and is one of the most common vessels of frigate tonnage to see service in the Reconquest, with almost a thousand operational by 2672. It is a relatively new class as its specifications were laid down late in the development of the UCM military machine to allow for the designs for its cargo to fully mature.

The New Orleans' formidable payload of armoured units and mechanised infantry are deployed by agile dropships, making it ideally suited to fluid, early stage combat operations where heavy enemy action is anticipated. It is one of the largest vessels the UCM has that is capable of atmospheric operations – an essential feature as most UCM dropships cannot operate in the void and must be deployed in atmosphere.

Sheffield	45 pts
Heavy Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	6"	3"	5	3+	4+	-	1-4	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-
Taipan Laser Turrets	F/S	2	2+	1	E	Critical-1, Scald-2

Detroit	50 pts
Heavy Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	6"	3"	5	3+	4+	-	1-4	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-2200 Mass Driver Turret	F/S	1	4+	1	K	-
Arowana Missile Turrets	F/S/R	6	3+	1	K	Close Action, Scald-1

Istanbul	57 pts
Monitor	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
6"	10"	4"	4	3+	4+	6+	1-3	Monitor

Name	Arc	Att	Lock	DMG	Type	Special
UF-B-9000s (Anti-Ship)	FN	3	3+	2	K	Alt-1, Focused, Penetrator
UF-B-9000s (Bombardment)	F	2	4+	2	K	Alt-1, Bombardment, Penetrator

Famous ships of the class: *Fist of Osman, Suliman, Loyal Janissary*

The Istanbul is a typical naval defence monitor. Frigate-sized, it features armour as thick as a battleship's and low speed to match. UCM Monitors achieve this through dispensing with Foldspace capability; they must be brought into system by tugs - large vessels under the auspices of the Fleet Logistical Corps. Once in system, its undersized, overstretched sublight thrusters slowly get the monitor into position.

This massive sacrifice of mobility also frees up considerable power for weapons, allowing the Istanbul to be over-gunned for its relatively small size. It features a massive UF-B-9000 mass-driver, in a unique, rotating mount; supporting its defensive role. This allows the Istanbul to easily engage targets in higher orbital layers or directed towards the surface for bombardment.

Vienna	60 pts
Escort Frigate	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
6"	6"	4"	4	3+	4+	6+	1-3	Aegis-3, Escort

Name	Arc	Att	Lock	DMG	Type	Special
Mamba Laser	FN	3	3+	1	E	Burnthrough-1, Flash-1, Focused

Famous ships of the class: *Musketeer, Arquebus, Count Nicholas*

The Vienna shares some advantages and disadvantages of its sister class: low speed, high armour, and high firepower. However, it must be used in a slightly more conventional manner, since it suffers the same loss of performance when firing between orbital layers as ordinary vessels. It makes up for this by mounting an anti-ship laser - the smallest UCM ship to be able to do so - due to its otherwise low power requirements.

It also fits into a quite different role: that of battleship escort. Used in this way, its laser serves the useful secondary purpose of heating the target, assisting the much larger ship's gunnery. Given this application, the Vienna also mounts additional point-defence clusters for limited aegis capability, although not up to the level of the Jakarta, which was designed for this role alone. Since its sublight speed matches that of a slow battleship, it can keep up.

Reykjavik	45 pts
Cutter	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
14"	6"	3"	5	5+	4+	-	2-3	Vectored

Name	Arc	Att	Lock	DMG	Type	Special
UF-9000-S Twin Mass Driver	FN	2	3+	2	K	Focused, Penetrator

Famous ships of the class: *Arrow, Lancelot, Harpoon, North Star*

Cutters have been a specialist part of the UCMF since its inception. The concept is simple: a fast ship near frigate tonnage designed to chase and slay already fast enemy scouts, outliers and support vessels. The Reykjavik is the newest of these, having only entered widespread service early in the Reconquest. The vessel is state of the art, crew-centric and one of the fastest ships in the fleet through the simple expedient of a bloated drive bank more suited to a cruiser.

Reykjaviks generally operate ahead of the main fleet and are often tasked with making the first small but crucial kills in an engagement. The class is well equipped to achieve this, packing a pair of fixed UF-9000-S mass drivers: short-barrelled versions of those found on dreadnought turrets. These weapons are powerful enough to worry anything, though cutter captains would do well to consider the fragility and specialist role of their ships before tackling larger prey.

Nuuk	35 pts
EM Harasser	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
14"	6"	3"	5	5+	4+	-	2-3	Vectored, Rare

Name	Arc	Att	Lock	DMG	Type	Special
Haywire Blaster	F	1	4+	0	C	Status

Famous ships of the class: *Blizzard, Shard of Ice, Frostblade, Harpoon, Nuuk*

The Nuuk is a unique support vessel based on the UCMF's newest cutter, the Reykjavik; a specialist platform to begin with, it offers extreme speed at the expense of survivability. The UCMS Nuuk was built by Battlefleet Eden using a Reykjavik damaged during a combat trial. By simply refitting the power-hungry mass drivers for a satellite-grade EM Haywire Blaster, they created a tool that the Admiralty was quick to appreciate. Such was the tactical potential that many hulls intended to be Reykjaviks were converted to Nuuks at the construction stage.

The Nuuk's ability to directly damage an opponent is limited, but a concentrated, close-range blast from its beamer can render an enemy ship confused and unable to compute complex tasks, such as plotting firing solutions for all weapons.

This is devastatingly effective at hobbling capital ships, although Nuuk captains must use their speed to get behind their targets before their small ship is vaporised by a vengeful giant.

Oslo	57 pts
Cutter	L / 30mm

Light Torpedo	1	Limited-2

Famous ships of the class: *Mjolnir, Black Prince, Vengeance*

The Havana is the earliest type of destroyer currently in service with the UCMF, having first seen combat with the Shaltari in 2596. Its design stems from older and largely outmoded naval strategies revolving around the use of torpedoes as primary weapons. Since the 2620s, the Admiralty shifted away from the idea of these colossal munitions due to their very limited capacity and a tendency towards overkill. Both traits make them unreliable and expensive weapons compared to mass drivers.

As the vast naval build-up to the Reconquest gathered steam, it was deemed that torpedoes should not consume precious resources for anything other than large vessels. As such, production of the Havana more or less ceased. Those that remain (and have survived the first few years of carnage) are now highly prized assets, able to deliver stunning amounts of damage to any target, disproportionate to their size. While the Havana may be a dinosaur in the modern fleet, old school admirals greatly covet the spectacle of the swift and violent hammer blow that only a 200m long explosive can provide.

Load	Launch	Special
Fighters & Bombers	1	Alt-1
Mines	1	Alt-1

Famous ships of the class: *Hornet, Commandment, Atoll*

The Vancouver class emerged from the UCMF Naval Design Bureau in the late 2640s in response to the obvious need for more cost effective fighter and bomber support than the well armed Seattle class offered. The Bureau opted for a vessel of destroyer tonnage - that is, a ship larger than a frigate but smaller than a cruiser for ease of mass manufacture. As a relatively new class, its numbers are currently low but increasing as the ever growing demands and spoils of the Reconquest spur the yards into unprecedented productivity.

As a fighting ship, the Vancouver is very poorly armed in comparison with the Seattle, but offers a greater launch capacity in comparison to its cost. As such, it is best utilised in rearguard and central fleet operations, where conventional warships can protect it from enemy action. Thanks to its bomber compliment, the Vancouver is particularly dangerous to smaller vessels with poor point defence, while its fighters can lend crucial protection to other vessels.

Kyiv	60 pts
Heavy Destroyer	L / 30mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	6"	4"	6	3+	4+	-	1-2	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-9000 Twin Mass Driver	F	2	3+	2	K	Fusillade-1, Penetrator, Re-Entry

Famous ships of the class: *Aleksy the Great, Green Square, Wrathful*

The Kyiv is an interesting vessel, in that it features a pair of super-heavy, UF-9000 series mass drivers in a fixed position. These impressive weapons are heavier gauge than those mounted in almost any other UCMF warship, save the mighty dreadnoughts. The mission role of Kyiv class is to hunt and kill the most heavily armoured enemy vessels with swift brutality. They are unsubtle sledgehammers and the bane of enemy flagships. Many an enemy admiral has met their ignominious deaths at the hands of this smaller adversary since its inception in the 2640s.

These weapons are also large enough in gauge to fire new and experimental munitions featuring molecular repulsion technology. These can cut through atmosphere and reach targets normally safe from the attentions of orbiting spacecraft.

It is also an unusual ship due to its triple-hull configuration, borrowing core superstructure elements from standard UCMF destroyers, although with reinforced armour superior to that of most other light vessels. Although artificial gravity creates the comforting illusion of "up and down" as usual, the fact that other segments of the ship are oriented differently never ceases to confuse fresh crew members!

Name	Arc	Att	Lock	DMG	Type	Special
Artillery Cannons	F	3	4+	2	K	Calibre-H/C, Critical-1, Fusillade-3

Only ship of the class: *- Leaden Triad*

Leaden Triad is a new, experimental vessel designed and built by the restored Eden Drive Yards Corporation. This pre-war colossus was ended by the Scourge invasion, but this reincarnation is based in its recaptured shipyards, and the new corporation has all the recovered tech of its predecessor, including its work on the largest chemical guns ever built. Though they never got a chance to enter service, three prototypes were recovered and have been installed aboard a unique heavy destroyer hull.

Captain Rhiannon Major, already the UCM's finest naval gunnery officer at just 34 years of age, has been given command. Though not a natural leader, her icy bravery and uncanny intelligence are the natural fit to shepherd this project into combat testing. Already, she has demonstrated the devastating power of this antique technology when writ large by deftly annihilating two Bioficer battlecruisers. These guns hurl house-sized shells at vast muzzle energy with negligible power drain, allowing full manoeuvrability and systems use while firing weapons far exceeding this ship's tonnage grade. However, despite Major's calculations and brilliant heat management, frequent and ultra-costly barrel changes seem inevitable.

Osaka	70 pts
Light Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	6"	8	4+	3+	-	2-3	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-6400 Mass Driver Turrets	F/S	4	3+	2	K	-

Famous ships of the class: *Paladin, Dire Wolf, Belfast II, Wakizashi*

The Osaka class is the standard light cruiser of the UCMF, designed for aggressive strike operations and flanking raids. In combat involving advanced manoeuvres, the class can deliver a mass driver firepower equivalent of the heavier Rio class while offering superior speed and cost effectiveness. However, the Osaka cannot match it in more stable situations where the Rio's full firepower can be unleashed. As such, Admirals are instructed to exploit this class' strength while acknowledging its weaknesses, including its limited close action capabilities compared to full cruisers and its lighter hull.

Captains graduating from a frigate-level command often prefer light cruisers such as the Osaka as many of the same combat principles apply and the access to high combat speed remains. Indeed, Osakas are normally deployed in squadrons where they can support each other in battle, since by necessity they often operate away from the main fleet.

New Cairo	70 pts
Light Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
10"	6"	6"	8	4+	3+	-	2-3	-

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser	FN	5	3+	1	E	Burnthrough-1, Flash-1, Focused

Famous ships of the class: *Sunstar, Excalibur, True Arrow, Firebrand*

The New Cairo class light cruiser is a recent development of the Osaka class that only entered service in 2669, making it one of the newest types in the UCMF. The New Cairo is armed with a single Cobra heavy laser, a powerful weapon capable of cutting to the core of an enemy capital ship and more than capable of slicing a frigate in half in a single burn. However, its utility is limited to a narrow arc in front of the ship, making the New Cairo an even more focused tool than the Osaka in an Admiral's arsenal. Primarily, it excels at hunter-killer missions against priority targets where it can use its superior combat speed to attain a firing position. Much like other light cruisers, the New Cairo is less effective in general engagements or in the heart of the battle, where its lack of flexible firepower is telling.

New Cairos tend to attract captains with a focused zeal on the mission at the expense of all surrounding distractions, verging on the single-minded. A ridged adherence to orders coupled with aggression is also essential as these attack dogs must strike decisively and quickly if they are to prevail in the maelstrom of combat.

Boston	75 pts

UF-6400 Mass Driver Turrets	F/S	4	3+	2	K	-
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Famous ships of the class: *Gaius Duilius, Constitution, Soldier of Fortune, Song of Hope*

The Rio class cruiser is the most common capital ship type in service with the UCMF in 2672, with 125 vessels currently in the register and several more under construction. It offers a good balance of speed and survivability, coupled with flexible firepower. Its many mass driver turrets are carefully placed to provide excellent traversable firepower, making it highly flexible in fluid, frontline operations where threats can come from multiple quarters.

This class has been the mainstay of the fleet's vanguard operations for many decades and has thus once been the command of many of the fleet's current Admirals. Some ships of this class are over fifty years old by this time and have accumulated accolades and personalities that most newer ships cannot match. Despite their venerable age, these older Rios have been performing admirably across the battlefields of the Reconquest, proving that their storied careers are far from over.

Berlin	78 pts
Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	6"	6"	10	4+	3+	-	1-2	-

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser	FN	5	3+	1	E	Burnthrough-1, Flash-1, Focused
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Famous ships of the class: *Aurora, Spear of Destiny, Surefire, Ardent*

The Berlin class cruiser was developed in the 2650's as the first cruiser-tonnage platform to bear the formidable Cobra anti-ship laser. This weapon had previously only been mounted on larger ships, where its colossal power requirements would be more manageable. With the constant advances in technology that characterises the build up to the Reconquest, it became possible to use the weapon on smaller ships. The marriage of the Cobra and a more agile hull proved highly effective and the Berlin class quickly became a mainstay of the fleet, although demand from the Admiralty has always outstripped supply from Niccolum's shipyards.

The Berlin is a highly effective vanguard unit, capable of taking significant punishment while responding with a range of weapons systems against multiple threats. The Cobra laser itself is most often employed against high value assets where its focused devastation can prove decisive. The weapon also has the useful side-effect of heating the hull of the target ship, making it far easier for the rest of the fleet to achieve accurate target locks.

Madrid	86 pts
Cruiser	M / 40mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
8"	6"	6"	10	4+	3+	-	1-2	-

Name	Arc	Att	Lock	DMG	Type	Special
UF-B-8000 Bombardment Turret Pair	F/S/R	8	4+	1	K	Bombardment, Scald-1
UF-4200 Mass Driver Turrets	F/S	4	4+	1	K	Fusillade-2

Famous ships of the class: *Punisher, Righteous Revenge, Death's Shadow, Hammer of Justice*

The Madrid class cruiser has long been an essential part of the UCM's Reconquest plan since the first hull was laid down in 2642. This class is the most common capital ship in the UCMF dedicated to the orbital bombardment role – a crucial component in any planetary assault. Its primary armament is a pair of turreted UF/B-8000 bombard cannons - massive calibre conventional weapons capable of hurling heavy shells towards a planet's surface to inflict biblical damage on ground targets. These weapons are also surprisingly crude and thus inexpensive to produce which is vital, since the UCM is always in need of their services.

While it also carries some ship-to-ship weapons, the Madrid requires close protection against enemy vessels above frigate tonnage since its bombardment cannons are useless against void targets. In its intended role, the Madrid can level whole districts in minutes by accurately targeting key areas while leaving the majority of the city intact for later capture. The captaincy of such a vessel is not for the faint hearted or those with a classical sense of honour, who would surely blanch at the idea of visiting ruin on hapless multitudes from orbit.

Fighters & Bombers	2	-
Optional Launch		
Mines	2	-

Minelayer

This ship may replace its Fighters & Bombers with Mines for +4 pts.

Famous ships of the class: *Ark Royal, Midway, Enterprise, Waning Tide*

The Seattle class is multi-role cruiser tonnage carrier for void-capable fighters and bombers. Its capacious hangars accommodate a large number of these nimble strike craft while the ship itself is armed with four UF-6400 mass drivers in a pair of turrets for direct ship-ship engagements. These characteristics make the Seattle a flexible and valuable asset in almost any engagement despite its lower launch capacity compared to some of the more dedicated carriers of other races.

As a fleet carrier, the Seattle is often positioned towards the rear of the battle, where its strike craft can support the main formation while it stays clear of the engagement. However, since it sports reasonable anti-ship firepower and launch assets have low power requirements, it is possible for the Seattle to use both while conducting advanced manoeuvres. This makes the Seattle a potent tool in the hands of a skilled captain whose carefully directed aggression and quick thinking are rewarded with disproportionate damage to the enemy.

Load	Launch	Special
Bulk Landers	4	-

Famous ships of the class: *Warbringer, Ark of Ferrum, Sanctuary, Conqueror*

The San Francisco is the UCM's primary means of getting massive troop concentrations planetside. While strike carriers such as the New Orleans utilise dropships in tactical assaults against hardened targets, they cannot deliver the sheer numbers of troops needed in planetary conquest. Troopships instead utilise bulk landers to drop thousands of men direct from orbit. While more efficient than strike carriers, troopships are best utilised away from enemy ships since they cannot operate in the relative safety of atmosphere.

Vessels of the class can accommodate around 25,000 troops and support staff for protracted operations or briefly up to 60,000 in cramped conditions, such as during the opening day/s of full planetary invasions. A San Francisco's bulk landers can also deliver payloads too large for dropships, such as ground batteries, making them essential for fortifying captured or unoccupied ground.

Arowana Missile Turrets	F/S/R	6	3+	1	K	Close Action, Scald-1
Arowana Missile Turrets	F/S/R	6	3+	1	K	Close Action, Scald-1

Only ship of the class: *Flying Dutchman*

Captain Francis Mendoza has destroyed more enemy tonnage in his career than any other colonial officer of his rank. He famously captained the light cruiser Crimson Heart throughout the 1st Battle of Olympus to nine capital ship kills before his vessel was crippled. Before and since he has built a reputation for single-minded, ruthless lethality. His steely disregard for the wider fleet has precluded any further promotion, but the Admiralty has now recognised his stellar record with a new, experimental command.

The Flying Dutchman is a heavy cruiser of currently unique design. She was envisioned as a short mission duration ship-killer to be brought in under dire circumstances. With additional engines she is much faster than any other current UCMF vessel of her tonnage while offering a suite of aggressive gunnery at the expense of ammunition, fuel, and consumables storage. Her ultra-short endurance might preclude the design from wider adoption, but the Admiralty could find no captain more suitable for this experimental vessel than Mendoza.

Swordfish Missile Bays	F/S/R	8	4+	1	K	Close Action

Feature Carrier

When building your fleet, this Ship must be assigned a Deployable Feature from the UCM Deployable Features list, paying points for this Feature. This Ship starts the game carrying that Deployable Feature.

UCMA Battlenet

An Admiral assigned to this ship gains the following Command Abilities:

Cost	Effect
2AP	**Double Time Bulk Line:** When you activate another friendly Group in Orbit, until the end of its activation, that Group may launch its Bulk Landers as if the target Dropsite has no enemy Battalions.
2AP	**Feet First into Hell:** When you activate another friendly Group in atmosphere, until the end of its activation, that Group can launch its Dropships or Drop Pods with a range of 6". Drop Pods launched due to this rule ignore the Alt-X rule.

Famous ships of the class: *Babylon, Alexander the Great, Gaugamela, Nebuchadnezzar*

The Babylon shares the substantial armaments and fleet carrier capacity as its sister class, the Byzantium super battleship, but the Babylon elevates its anti-shipping capabilities by replacing the bombardment turrets with UF-6400 mass driver turrets. This was only possible due to the UCM's latest battleship superstructure and its enhanced power generators. Together, its extensive weapons suite is enough to obliterate any foe.

Byzantium	325 pts
Super Battleship	H / 50mm

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser Pair	FN	8	3+	1	E	Burnthrough-2, Flash-2, Focused

Famous ships of the class: *Byzantium, Constantine, Saladin, Basilic*

The Byzantium super battleship was designed to spearhead anti-surface operations. The class has substantial bombardment capabilities coupled with enough firepower to annihilate any foe it might encounter, including torpedoes and a Python super-heavy laser. Once at its firing station, it can use its substantial fleet carrier capabilities to send waves of fighters and bombers further afield to secure the battlespace.

Carthage	315 pts
Super Battleship	H / 50mm

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser Pair	FN	8	3+	1	E	Burnthrough-2, Flash-2, Focused

Famous ships of the class: *Hannibal, War Elephant, Phoenician, Scipio Africanus*

Much like its sister class, the Babylon, the Carthage is configured for the annihilation of enemy ships. The Carthage focuses almost entirely on kinetic damage though, built around a pair of colossal UF-12000 mass drivers in a fixed frontal mounting. It maintains its sister's fleet carrier capacity for enhanced strategic might. Should energy weapons be required, its UF-4200 turrets may be upgraded to a pair of Cobra heavy lasers—an option it shares with other UCM battleships.

Thebes	305 pts
Super Battleship	H / 50mm

Laser Refit

This Ship may take a Laser Refit for +10 points, replacing both of its UF-4200 Mass Driver Turrets with a single Cobra Heavy Laser Pair.

Name	Arc	Att	Lock	DMG	Type	Special
Cobra Heavy Laser Pair	FN	8	3+	1	E	Burnthrough-2, Flash-2, Focused

Famous ships of the class: *Thebes, Cadmus, Cassander, Ark Majesty*

The Thebes is the latest super battleship class to enter service with the UCMF. The Naval Design Bureau began with the Carthage's superstructure and weapons payload but reconfigured its cavernous launch bay forecastle for surface deployments in addition to mounting a pair of UF-6400 turrets. From here the Thebes can launch bulk landers, drop pods, and boarding torpedoes. Already, the class has earned a reputation as a golden deployment for landing troops since they're unlikely to perish aboard ship before making planetfall.

London	490 pts
Dreadnought	C / 60mm

Thrust	Scan	Sig	Hull	ES	KS	BS	G	Special
6"	12"	14"	24	3+	3+	5+	1	Aegis-6, Command Ship-1, Reinforced Armour

Name	Arc	Att	Lock	DMG	Type	Special
UF-9000 Mass Driver Turrets	F/S	2	2+	2	K	Critical-1, Penetrator, Volley-2
UF-6400 Mass Driver Turret Battery	F/S	8	3+	2	K	Volley-2
UF-4200 Mass Driver Turret Battery	F/S	10	4+	1	K	Fusillade-5, Volley-2
Leviathan Missile Bays	F/S	8	3+	1	K	Close Action

Famous ships of the class: *London, Robert A Bernard, Destiny, Sceptered Empress, Triumph*

Triple the displacement of a Battleship, the London is one of the most powerful warships ever produced by mankind, armed with fifty mass drivers in various gauges. One may annihilate an entire fleet, unassisted.

It takes an entire orbital yard sector three years to lay down the hull of one of these ships. The sheer resources to outfit crew and maintain the ship reserves its use for the direst circumstances, commanded by the UCMF's most decorated Admirals. Each is a legend in its own right.

Washington	530 pts

Fighters & Bombers	8	Alt-1
Heavy Bombers	4	Alt-1

Famous ships of the class: *Washington, Eisenhower, Nimitz, Our Will, Shield of Aurum*

The Washington is the largest military starship in UCMF. Examples include the Shield of Aurum, the UCMF's flagship and Our Will, the most decorated Colonial vessel.

Its mass drivers match any battleship, but its strength lies in its launch compliment, more than an entire strike group—pivotal, if deployed skilfully. Just one of these monstrosities can throw up an impenetrable fighter screen or a wave of bombers dense enough to cripple a battleship in one blow.
