FAQ and Errata

Welcome to the Dropfleet Commander FAQ and Errata.

This document contains answers for many frequently asked questions as well as amendments to the core rules and ship stats. This document aims to be an errata for the printed version of the Dropfleet Commander rulebook, the most up to date version of the rules is available as a free digital download.

Every change or question that is new to that edition of this document will be marked in blue.

Previous changes will be marked in green.

~~Changes that are no longer current will be marked with a strikethrough and removal version number.~~

◊ Individual change entries new to this document will be marked with a diamond.

~~Version 1.0 published 17th October 2024.~~

~~Version 1.1 published 24th October 2024.~~

~~Version 1.2 published 13th January 2025~~

~~Version 1.3 published 18th August 2025~~

Version 1.4 published 4th November 2026

New Rules

14.1.20 Impetuous

Add the following special rule "At the start of each round, friendly Groups with this rule improve the Lock of their Weapon Systems by 1 until you activate a friendly Group without this rule."

14.1.21 Reinforced Armour

Add the following special rule "Weapons rolling to hit this Ship or its Group increase the result needed to score a critical by 1 (so a weapon that would crit on a 4+ crits on a 5+ instead)."

14.1.22 Vanguard-X"

Add the following special rule "Groups with this rule may begin the game Directly Deployed, ignoring the normal Scenario Deployment and Approach Types (though still counting towards Groups Directly Deployed). If it does, it may be deployed up to X" away from your Deployment Zone."

14.1.24 Boardable

◊ Add the following special rule "This Ship can have Battalions Assigned to it as if it were a Space Station.

At the start of the round, this Ship is controlled by a Player if only they have any Battalions on it, lasting until the end of the round.

Players that control a Boardable Ship may activate it as if it were a Ship in their Fleet, after all other Groups have activated."

14.1.25 Civilian Transport

◊ Add the following special rule "This Ship can only choose the General Quarters order.

This Ship cannot be attacked unless it is controlled by a player. Players cannot attack a friendly Civilian Transport.

The Controlling player cannot target this Ship with Abilities."

14.1.26 Mercenary (X)

◊ This Ship may be used in X faction Fleets. When taken as part of your fleet, this Ship loses its Boardable and Civilian Transport rules.

14.2.30 Reave-X

Add the following special rule "Each of this Weapon's criticals reduces the Energy/ Kinetic save used against that hit by X.

E.g. a Reave-1 weapon rolls 3 dice to attack, one is a hit and the other two are a critical. The hit is saved against using the target's normal save value, the criticals are saved against using the target's save value reduced by X."

14.2.31 Anti Wing

Add the following special rule "This weapon may target enemy Wings as if they were Ships (with a Sig of 0") but reduces its Lock value by 1 for that attack. If it does, for each hit, remove 1 Fighter or 1 Bomber from that Wing or any other enemy Wing within 3" of the target."

14.2.32 Point Blank

◊ Add the following special rule "A weapon with this rule can only be assigned targets in base contact and on the same Orbital Layer. This Weapon counts as a Close Action weapon for Orders purposes. This Weapon cannot target Cities."

FAQ and Errata

Errata

Ship Characteristics

1.2 Weapons

Add the following paragraph “Sometimes a rule may refer to a **Weapon System**. This is the same row in the weapons table across each Ship in a Group.”

The Basics

2.1.1 Dice Roll Modifiers

◊ Change the last paragraph to “Modifiers are cumulative and cannot make a dice roll impossible or certain. Total up all modifiers to a dice roll before rolling any dice. Dice rolls cannot be modified to be better than a 2+ or worse than a 6+.”

2.3.2 The Table

Add the following paragraph “Unless otherwise specified, any Ship that moves off of the table during its activation counts as destroyed by each opponent, or captured by each opponent if it had any enemy battalions on it. If any Ship is moved off of the table outside of its activation, it counts as captured by each opponent. Ships allowed to fly off of the table may do so as described in that rule with no penalty.”

Core Concepts

3.2.1.3 Formation Benefits

◊ Change the 1st bullet point to "Any Crippling Effect rolls for Ships in this Group of a 10+ become a Structural Damage result instead. Crippling effects due to special rules are unaffected."

◊ Change the 4th bullet point to “They may measure Weapons range from the Group’s Lead Ship (targets must still be in the attacking Ship’s own arcs).”

3.3 Spikes

Add the following paragraph “Ships that track their own Spikes may have up to 4 Spikes. Any gained above this limit are lost. If both a Ship and its Group have separate numbers of Spikes, only the highest is used.”

3.4 Arcs

Add the following paragraph after the 1st “When measuring to a Ship, if that Ship’s stem is between two arcs, pick one for it to be in. It cannot be in both.”

3.4.3 Broadside (B)

◊ Change the last sentence to "Broadside Arcs are separate arcs and sometimes restricted to either Left (BL) or Right (BR) sides."

Preparation

4.2 Build Your Fleet

◊ Change the restriction for Heavy Tonnage to “No more points of Heavy and Colossal Ships than Medium Ships.”

Add the following restriction to Colossal Tonnage “No more points of Heavy and Colossal Ships than Medium Ships.”

4.2.1.1 Abilities and Ability Points

Add the following Ability names to the specified abilities in the table:

1st: **AP Dice Bonus**

2nd: **Brace for Impact**

3rd: **Contain Reactor**

4th: **Time to Target**

~~r1.3 Change the 1st sentence of AP Re-roll to “After you roll any dice, you can re-roll a single dice in that roll.~~

~~r1.4 Change the AP cost of AP Re-roll from 1AP to *AP~~

~~r1.4 Change AP Re-roll to “Once per Group, Asset, or Dropsite activation, after you roll any dice, you can re-roll any number of those dice. You may re-roll multiple dice in a single roll this way but must re-roll at least one dice, spending 1AP for each dice re-rolled.”~~

◊ Change AP Dice Bonus to “Once per Group, Asset, or Dropsite activation, or during the Repair step of the End Phase, after you roll any dice, you can add 1 to the result of one of those dice. This Ability cannot be used on D3s or dice results of a 1, and dice modified by this ability cannot score criticals.”

◊ Reduce the cost of Brace for Impact from 2AP to 1AP.

~~r1.4 Change Brace for Impact to “When a player would roll for Crippling Effects, instead of rolling, make the result of a Crippling Effect roll (for you or your opponent) a 4.”~~

◊ Change the effect of Brace for Impact to "After you roll for Crippling Effects, re-roll the Crippling Effect roll."

Change Contain Reactor to "When a player would roll for Explosion, instead of rolling, make the result of an Explosion roll (for you or your opponent) a 2."

Change Time to Target to "After moving a Wing of your Fighters or Bombers, you may move that Wing (or the Wing it combined into) a second time with a Thrust of 6". The Wing cannot divide into smaller Wings or form/be formed into larger Wings due to this additional movement."

~~r1.4 Add the following paragraph after the Abilities table "Each Ability has a set trigger, and its use can only be declared when this trigger is met. AP is expended when the Ability is declared. Once play has moved on from that trigger, the Ability cannot be used until the next time its trigger would apply."~~

◊ Change the 3rd paragraph to "Each ability has a set trigger and its use can only be declared when this trigger is met (e.g. At the start of a Group's activation), before any other abilities are resolved. AP is expended when the ability is declared. Multiple abilities can be used on the same trigger, but each ability can only be used once per trigger. If multiple players use an ability on the same trigger, resolve these abilities in reverse initiative order with each player choosing the order their abilities resolve in.

4.2.1.2 Faction and Famous Admirals

Change the first paragraph to "Faction and Famous Admirals grant players additional Abilities. These may only be used once per triggering effect and only while their respective Admiral is on the table. If that Admiral is killed or leaves the table, any effects of previously used Abilities will continue and end as normal."

Add the following paragraph to the end of section "Faction and Famous Admirals adhere to the same restrictions on Game Size as found in 4.2.1 Admirals, with Level 5 Famous Admirals counting as a Level 4 Admiral for these purposes."

6.3 Determine Initiative

Change the 1st paragraph to "Each player rolls a dice, the player with the highest score has 1st initiative, the 2nd highest has 2nd, and so on. The player with the highest-level Admiral on the table (or players if tied) adds 1 to the result of their dice."

~~r1.4 Add the following paragraph to the end of this section "The AP Re-roll ability cannot be used to re-roll any dice in your roll to determine initiative. Other abilities may still affect this roll."~~

Activation Phase

7 Activation Phase

Change the 2nd paragraph to "That player chooses an order for the activated Group. Orders are performed in the specified sequence, completing one action (moving, turning, attacking, etc) with the Group before moving on to the next action. Once that Group has completed its Order, the next player activates one of their Groups."

7.1.3 Weapons Free

~~r1.3 Change the 2nd paragraph to "Each Ship may attack with all the Weapons listed on its profile (before any special rules)."~~

Change to "The Group cannot turn and must move between half and full Thrust.

Each Ship may attack **with any number** of its Weapon Systems.

Each Ship may then launch Assets, then the Group gains two Spikes at the end of its activation."

7.1.6 Damage Control

~~r1.4 Change the last paragraph to "During the Repair step of the End Phase, roll 2 dice for each Crippling Effect the Group attempts to repair. While rolling to save against Core hits due to Boarding Actions, this ship improves its BS value by 1 or gains a BS of 6+ if it has no BS value listed."~~

◊ Change the 2nd paragraph to "The Group may turn up to 45 degrees, then must move up to half its Thrust."

◊ Change the last paragraph to “At the end of this Group’s activation, it rolls to repair as if it was the Repair step of the End Phase, then attempts to repel boarders. Roll either a Backup save or a roll of a 6+ for each enemy Battalion aboard each Ship in the Group and remove an enemy Battalion from that Ship for each successful dice.”

7.2 Move

◊ Change the last paragraph to "Ships may move through other Ships, tokens, and most scenery, but cannot end their move with their base overlapping any other base. Where possible, a Ship must move to within the specified movement distances stated by its order. If a Ship cannot be placed anywhere between these distances due to bases overlapping, it is placed the minimum available distance from its starting position so that bases are not overlapping along its line of movement."

◊ Add the following paragraph “A Ship that must move due to an order but chooses to move 0” (such as the Course Change order) during its movement counts as having moved.”

7.3.3 Roll To Hit

◊ Change the 4th paragraph to “Roll to hit with all assigned weapons before your opponent rolls to save.”

7.3.4 Roll to Save

Change the first sentence to “The defender (or an opponent for uncontrolled/uncontested dropsites) rolls a dice for each hit using the corresponding save value.”

Change the 5th Paragraph to “Core Weapons (C) hits can only be prevented by Shield saves (if applicable) then Backup saves.”

◊ Remove the 6th paragraph.

7.3.5 Inflict Damage

◊ Add the following paragraph at the start of this section “After the defending player rolls to save, allocate the remaining hits to Ships in the defending Group. Starting with the hits with the greatest damage, allocate these hits to the Ship with the least remaining Hull Points until there is enough damage from those hits to destroy it. Any damage from hits beyond a Ship’s remaining Hull Points are lost. Then continue allocating hits this way to the next Ship with the least remaining Hull Points and so on. If all remaining Ships are undamaged or equally damaged, allocate from the closest Ship to the attacking Group’s Lead Ship to the furthest.”

◊ Remove the 3rd paragraph

◊ Add the following paragraph at the end of the section “Allocate all hits before rolling for Crippling Effects.”

7.3.6 Roll for Crippling Effects

Change the 2nd sentence to “The defending player rolls 2D6 and consults the table below.”

~~r1.3 Change the effect of Defence Systems Offline to “Gain a Defence Systems Offline token, preventing this Ship from making Energy, Kinetic, and Shield Saves. Repairable.”~~

7.3.6 Crippling Effect Table

~~r1.3 Fire - Change “for each Fire token is has.” to “for each Fire token it has.”~~

Change the effect of Fire to “Gain a Fire Token. At the start of the End Phase, before the Repair step, this ship suffers a point of damage for each Fire Token it has. Repairable.”

◊ Add the following sentence to Fire “This effect is repaired on a roll of a 3+ instead of a 4+.

Change the effect of Defence Systems Offline to “Gain a Defence Systems Offline Token. A Ship with a Defence Systems Offline token reduces its Energy, Kinetic, Backup, and Shield saves by 1, and may be targeted by enemy Ships as if their weapons had the Focused special rule, ignoring Formation Benefits if they do. Repairable."

~~r1.4 Change the last sentence of Orbital Decay to “This effect is repaired on a roll of a 6+ instead of a 4+.”~~

◊ Change the last sentence of Orbital Decay to "This effect is repaired on a roll of a 5+ instead of a 4+."

7.3.7 Roll for Explosion

Change the 1st sentence to "When a Capital Ship is destroyed by an attack, Crippling effect (including the resulting damage from one), or explosion effect it explodes."

Change the 2nd sentence to "The defending player rolls 1D6 and consults the table below. Apply the result to the Ship."

◊ Change the number of hits caused by Shredded, Fuel Detonation, and Reactor Overload from 2 to 3.

◊ Change the amount of damage caused by Foldspace Catastrophe from 2 to 4.

7.4 Launch Assets

~~r1.3 Change the 3rd paragraph to "When you launch Assets, place Assets up to their Launch Value within 6" of their Carrier (divided up as you wish) unless otherwise stated."~~

Change the 3rd paragraph to "Unless otherwise stated, when you launch Assets, place those Assets up to their Launch Value within 6" of their Carrier, divided up as you wish. This placement counts as moving through scenery when placed through or onto scenery."

◊ Add the following paragraph "When a carrier's load is shared between two different types of Launch Asset (e.g. Fighters & Bombers) you can choose any combination of those Assets to place when launching Assets, up to their Launch value."

7.4.1 Deploying Battalions

◊ Change the 2nd paragraph to "When you deploy Battalions to Dropsites, you may instead deploy them to a specific Feature on that Dropsite, dividing the total Battalions deployed as you choose between Dropsite and Feature."

◊ Change Bulk Landers Target to "Dropsites on any orbital layer. If that Dropsite or its Features have enemy Battalions on them, 2 Bulk Landers are needed to place 1 Battalion."

Change the target of Boarding Pods to "Space Stations and enemy Ships in the same Orbital Layer."

Deploying Features

◊ Change the 1st sentence to "Some Ships carry Deployable Features. These Ships are counted as carriers and may deploy their carried features onto Dropsites."

7.4.3 Immediate Combat

◊ Add the following section "After launching Assets, if any of those Assets were placed directly into base contact with specific targets, you may attack with those Assets immediately instead of during the Asset Phase. If the following conditions are met, the launched asset immediately attacks, using the rules for attacking with that asset (see 8.3 Asset Combat):

- Fighters launched into base contact with enemy Fighters or Bombers
- Bombers launched into base contact with Space Stations or enemy Ships
- Torpedoes launched into base contact with Space Stations or enemy Ships"

7.5 Activating Dropsites

◊ Remove this entire section along with 7.5.1.

Asset Phase

8.1 Battalion Combat

~~r1.4 Add the following paragraph after the 2nd paragraph "In initiative order, players assign combat to all friendly Battalions on a Dropsite/Feature in the following sequence:~~

~~All friendly Battalions on the Dropsite to a single one of its Features.~~

~~The Dropsite itself~~

~~Each Feature on the Dropsite to that Feature"~~

◊ Change the section to "Each Dropsite with Battalions belonging to 2 or more players and has not had Battalion Combat resolve this round is eligible for Battalion Combat. In initiative order, each player selects an eligible Dropsite to resolve combat on before moving on to the next. Repeat this until there are no more eligible Dropsites.

After a player selects a Dropsite to resolve, players follow this sequence to assign combat to Battalions:

1. Dropsite to Feature Combat

In initiative order, each player with Battalions assigned to the Dropsite may select a single one of its Features with opposing Battalions on it. In the same order, players remove equal amounts of Battalions from their Battalions assigned to the Dropsite and their chosen Feature until either no player, or only one player has Battalions remaining in that combat.

2. Dropsite Centric Combat

Each player with Battalions assigned to the Dropsite removes equal amounts of Battalions from it until either no player, or only one player has Battalions remaining in that combat.

3. Feature Centric Combat

For each Feature on the Dropsite, each player with Battalions on it removes equal amounts of Battalions until either no player, or only one player has Battalions remaining in that combat.

4. Feature Demolition

Players with an amount of friendly Battalions on a Feature equal to or greater than that Feature's remaining Hull that also contains no enemy Battalions may remove all of those Battalions to destroy that Feature.

5. Battalion Consolidation

Players may now consolidate Battalions they have anywhere on the Dropsite. If they do, they choose any amount of those Battalions and assign them to the Dropsite (any amount can be 0), then assign any remaining Battalions to a single Feature on the Dropsite.

When Battalions are removed in each step of Battalion Combat, they are removed simultaneously.

When a player has multiple types of Battalions in a combat, that player decides which of their Battalions are removed first. If players are allied, treat their Battalions as belonging to one player and decide with your ally/s whose Battalions to remove."

8.1.1 Activating Dropsites

◊ Add the following section "After players have completed Battalion Combat for a Dropsite, a player that controls that Dropsite, ignoring enemy deployed Features, activates it. For each Scenario Feature only they have Battalions on, they may attack with all its Weapons and/or launch all available Assets. Scenario Features containing enemy Battalions or Features deployed by other players cannot be used to attack or launch this way.

◊ Then, in initiative order, each player may activate all deployable Features they have on the Dropsite. Each Feature may attack with all its weapons and/or launch Assets.

◊ Deployed Features with only enemy Battalions assigned to them cannot be activated and lose all of their special rules (though still confer their saves to the Dropsite) until they have an equal amount of, or more friendly Battalions assigned to them."

8.2 Boarding Actions

~~r1.4 Change the last sentence in the 1st paragraph to "Captured Ships are worth **twice their points** when calculating points of Ships destroyed."~~

◊ Change the section to "Each Ship with Battalions belonging to an opponent and has not had Boarding Actions resolve this round is eligible for Boarding Actions. In initiative order, each player selects an eligible Ship with enemy Battalions on to resolve Boarding Actions before moving on to the next. Repeat this until there are no more eligible Ships.

Each player with Battalions on the Ship removes equal amounts of Battalions until either no player, or only one player has Battalions remaining.

Then, each friendly Battalion left aboard an enemy Ship inflicts a Core hit. Total these up before rolling backup saves. Each passed backup save also removes one Battalion. If the Ship is destroyed by the boarders, remove it from play without rolling for Explosion—that Ship is captured. At the end of the game, when determining points of Ships destroyed, captured Ships count towards this and are worth double their points.

If a carrier with Assets that deploy Battalions does not launch any of those assets this round, choose one of those Assets types. For each of the chosen Assets, this carrier removes an enemy Battalion on it before any Core hits are inflicted."

8.3.2 Wings

~~r1.4 Add the following to the second paragraph "When you divide a Wing, do so at the start of its movement. Place the new Wing anywhere in Thrust range of the original Wing, counting as its movement. Each Fighter/Bomber may only form or divide into Wings once each round—they cannot do both. If any assets in a newly formed Wing have moved, all assets in that Wing are treated as having moved."~~

◊ Change the 2nd paragraph to "Wings may divide into any number of smaller wings as part of their activation during that particular Asset's Form Wings step. A single Fighter/Bomber Asset is still a Wing. When you divide a Wing, place all new Wings in base contact with the original.

When you Form Wings, you can combine identical Assets in base contact into a single larger Wing. If you do, choose one of those Wings for the rest to be combined with. If any assets in a newly formed Wing have moved, all assets in that Wing are treated as having moved.

Each Fighter/Bomber can only form or divide into Wings once each round and cannot do both."

8.3.3 Activating Fighters

~~r1.2 Change the last sentence in the 3rd paragraph to "Otherwise, the Bomber Wing must make a 5+ save for each attacking Fighter—remove all the Fighters and one Bomber for each failed save~~

~~r1.4 Change the 3rd paragraph to "If attacking a Bomber Wing, remove the attacking Fighters and defending Bombers equally until only one of those Wings remains."~~

◊ Change the first five paragraphs to "When a player activates Fighters, follow these steps in order:

A. Form Wings

B. Fighter Movement

C. Fighter Attacks

Assets perform each step simultaneously; form all Wings before moving and move all Wings before attacking.

8.3.3.a Form Wings

During this step, you may form your Fighters into Wings and divide into Wings.

8.3.3.b Fighter Movement

For each of your Fighter Wings, move them in a straight line up to their Thrust value in any direction.

8.3.3.c Fighter Attacks

Fighters in base contact with an enemy Fighter or Bomber Wing may attack one of those Wings. Declare the use of all Fighters you wish to attack with before proceeding.

If attacking a Bomber Wing, remove the attacking Fighters and defending Bombers equally until only one of those Wings remains.

If attacking a Fighter Wing, remove all the Fighters in the smaller Wing and the same number of Fighters in the larger.

Once all their attacks have been resolved, the Fighter's activation is over. Any remaining Fighters can activate again in the next round."

8.3.3.1 Fighters – Close Protection

~~r1.3 Add the following sentence to the end of the 1st paragraph "Declare the amount of Fighters used before re-rolling any dice"~~

Change this section to "After rolling Kinetic or Energy saves against Close Action and Bomber (of any type) attacks, you may declare the use of any number of Fighters. Each Fighter used confers its re-rolls to a defending friendly Group within its Thrust range. The defending player assigns all re-rolls from each Fighter against specific weapons, dividing up Fighters as they choose. Shield and Backup saves cannot be re-rolled this way."

◊ Add the following sentence "Fighters cannot be used this way if there is scenery between them and any Ships in the defending Group."

8.3.4 Activating Bombers

~~r1.4 Change the 3rd paragraph to "Bombers attack as if they were a Weapon with the stats in their profile. Every friendly Bomber in every friendly Wing attacking the same target combines into one roll. Damage is assigned to a Group in the usual way, including against Ships not in base contact with the Bombers."~~

◊ Change the entire section to "When a player activates Bombers, follow these steps in order

A. Form Wings

B. Bomber Movement

C. Bomber Attacks

D. Remove Attackers

Assets perform each step simultaneously; form all Wings before moving and move all Wings before attacking.

8.3.4.a Form Wings

During this step, you may form your Bombers into Wings and divide into Wings.

8.3.4.b Bomber Movement

For each of your Bomber Wings, you may move them in a straight line up to their Thrust value in any direction.

8.3.4.c Bomber Attacks

Bombers in base contact with a Ship or Space Station may be used to attack that Ship or Space Station. Bombers cannot attack a Space Station with friendly Battalions or friendly Ships. Only Bombers with the Bombardment special rule may attack Descent Groups in Atmosphere or Cities, treating its template as a base. When you attack with a Wing, All Bombers in that Wing contribute to the attack. Declare the use of all Bombers you wish to attack with before proceeding.

Declare all Bomber attacks before rolling any dice.

Bombers attack as if they were a weapon with the stats in their profile, following the attack sequence from 7.3.3 Roll to Hit onwards. Each type of Bomber attacking the same target combines into a single roll for that type of Bomber, counting as a separate Weapon System.

Damage from a Wing is only allocated to the Ship it attacked. Any excess damage from the attack is lost.

8.3.4.d Remove Attackers

After completing an attack with Bombers, remove the attacking Bombers from play."

8.3.4.2 Saturation Fire

~~r1.4 Add the following section "For every Bomber in the attack above 6, the target must roll one fewer Energy / Kinetic / Shield Save against the Bombers attack, chosen by the defending player before any saves are made."~~

◊ Change to "Each type of Bomber attacking a Light Ship, or Crippled Capital Ship gains Saturation Fire against the target. After rolling to hit, for every Bomber above 6 in an attack, one hit of the attacker's choice for that type of Bomber becomes Core damage rather than Kinetic or Energy damage."

8.3.5 Activating Torpedoes

◊ Add the following sentence to the 2nd paragraph "Declare the use of all Torpedoes you wish to attack with before proceeding."

◊ Add the following section "8.3.5.1 Shooting Down Torpedoes: Weapons in Orbit and Escape Velocity weapons in Atmosphere may be assigned to Torpedoes. Torpedoes have a Signature of 0" and never have saves of any kind. Instead of inflicting damage, each hit against a torpedo reduces the Torpedo's Attack value by 1. If a Torpedo has its Attack value reduced to 0 this way, the Torpedo is removed.

When you attack a Torpedo this way, that attack always hits on a 6+."

8.3.6 Mines

◊ Change the last paragraph to "Mines attack as if they were a weapon with the stats in their profile. Every Mine attacking the same target combines into one roll. Remove a Mine after completing an attack with it. Roll for this attack when the Ship completes its movement, choosing a point within the Mine's Thrust as the enemy Ship's position and Orbital Layer for this attack, even if it ends its movement out of range and on a different Orbital Layer. Use this point for any explosion effects due to this attack. Mines can only damage the attacked Ship.

Mines may be used against torpedoes that move through the Mines' Thrust. Mines used this way ignore the penalties for attacking Torpedoes."

◊ Add the following section "8.3.6.1 Clearing Mines: Weapons in Orbit and Weapons with the Escape Velocity special rule may be assigned to Mines. Mines have a Signature of 0" and never have saves of any kind. Instead of inflicting damage, each hit against a Mine reduces the Mine's Attack value by 1. If a Mine has its Attack value reduced to 0 this way, the Mine is removed.

When you attack a Mine this way, that attack always hits on a 6+."

End Phase

9.1 Repair

◊ Change to "During this step, you may attempt a repair roll for each repairable Crippling Effect on friendly Ships. To make a repair roll, roll 1D6. If the result is a 4+, that Crippling Effect is removed, otherwise, the Crippling Effect remains."

Scenery

Change the 2nd paragraph to "Scenery only affects Ships, Space Stations, and Assets in Orbit."

Change the 3rd paragraph to "Scenery affects Line of Sight (including in 7.3.1 Determine Potential Targets) unless both ends of the line are in Atmosphere."

Change the 4th paragraph to "Unless stated, Scenery can be moved through and attacked through – meaning into, out of, or all the way through. When attacking through scenery, apply any relevant effects of that scenery unless both the attacker and the target are in Atmosphere."

◊ Change the 6th paragraph to "When placing scenery, it must be placed at least 4" away from board edges, deployment zones, other scenery pieces, and Dropsites unless otherwise specified."

10.1 Planetary Ring

◊ Change the 2nd paragraph to "Groups and Dropsites on one side of a Planetary Ring Ignore two Spikes on targets on the other side of the Planetary Ring if those targets are further than 3" away from the Planetary Ring. If the target is on the other side of the Planetary Ring and further than 6" away from it, ignore all of its Spikes instead."

~~r1.4 Change the 3rd paragraph to "After you move or place Assets into or through this, roll a dice. For each result of a 2+, remove one of those Assets (placing any Battalions after rolling). Assets deploying Battalions to a Dropsite with its centre underneath a Planetary Ring ignore the Planetary Ring."~~

◊ Change the 3rd paragraph to "Each Asset moved through this is removed on a 3+. Battalions deploying to Dropsites directly under a Planetary Ring are ignored."

10.2 Micrometeor Cloud

Change the last paragraph to "After you move or place assets into or through this, roll a dice. For each result of a 3+, remove one of those assets."

10.3 Debris Field

Change the last paragraph to "After you move or place assets into or through this, roll a dice. For each result of a 5+, remove one of those assets."

10.4 Large Object

Change the last paragraph to "These block Line of Sight. If any Ship or Asset is placed or moved through/onto a Large Object, it is destroyed."

FAQ and Errata

Dropsites

◊ Change the 3rd sentence of the 2nd paragraph to "Cities have a base the size of their template. Bases of Cities are ignored when moving and are moved over as if they were not there."

11.2 Damaging Dropsites

◊ Remove the 2nd paragraph.

Move the 3rd paragraph to a new section 11.2.1 Collateral Damage.

11.2.1 Collateral Damage

Add this section and the moved 3rd paragraph from 11.2 Damaging Dropsites.

Features

◊ Add a "Hull" column to each feature after its type column. Military Outposts have 6 Hull, all other listed Features have 5 Hull.

◊ Change Military Outpost KS from 5+ to 3+.

◊ Change Orbital Defence Gun KS from 3+ to 5+.

◊ Change Comms Station ES from 5+ to 4+.

◊ Change Power Plant ES from 4+ to 5+.

11.3.1 Damaging Features

◊ Add the following section "When you assign weapons to a Space Station or Bombardment weapons to a City, you may choose to assign any amount of those weapons to Features on that Dropsite instead of the Dropsite. Abilities and Special rules treat this weapon as targeting the Dropsite. If you do, use the saves of those Features instead of the Dropsite. Damage inflicted to features is tracked independently of the Dropsite. When a Feature is reduced to 0 hull points, that Feature is destroyed and is removed from the dropsite, along with all battalions assigned to that feature. Any remaining damage is ignored. Deployable Features that have an associated points cost count as Ships when determining Kill Points at the end of the game.

When an Attack targets both a Dropsite and a Feature on that Dropsite, battalions are removed from damage to or destruction of Features first. Then remove battalions for damage dealt to the Dropsite itself as normal."

Scenarios

12.1.1 1-Line

Change 2 Players to "All Ships in base contact with opposite table edges as shown."

Change 3-4 Players to "All Ships in base contact with a single table edge for each player."

12.1.1 2-Table Corners

Change 2 Players to "All Ships in base contact with a table edge up to 12" from opposite corners."

Change 3-4 Players to "All Ships in base contact with a table edge up to 12" from a single corner for each player."

12.1.1 5-Attacker Defender

Change the 1st paragraph to "1 Attacking Team in Red with all Ships in base contact with the table edge as shown."

12.1.1 6-Encirclement

Add the following paragraph "Scenario rules and Objectives that require you to measure distance from these Deployment Zones to a Dropsite reduce that distance by half."

12.1.2 Approach Type

Change the 2nd sentence to "When Groups deploy, unless otherwise specified they are placed with all flight stems within your specified deployment zone, with all Ships in Coherency in your deployment zone (so no Ship is outside of the deployment zone or Coherency) when they activate."

◊ Add the following paragraph after the 1st "If a Group is unable to fit completely within your deployment zone when it deploys, that Group instead remains off of the table until the next time it would be able to deploy, following its Approach Type. Any Groups that have not been deployed by the end of the game count as destroyed."

12.1.2.1 Directly Deployed

Change the last sentence to “From the 2nd round onwards, players that Directly Deploy may activate Groups not on the table.”

12.1.4 Variants – Expansive Atmosphere

Change “Full Thrust” to “Max Thrust”.

12.1.5 Objectives

~~r1.3 Change the last sentence of Extract to “Special Battalions on Payload Ships are transferred to a Porter Ship when the Payload Ship attaches to it.”~~

Change Raise to Raze

Change the 1st paragraph of Raze to “At the end of the game, players are awarded double Standard Scoring for each Dropsite that has been Levelled/Ruined that is 24” or more away from their Deployment Zone (regardless of who Levelled/Ruined those Dropsites).

Change Extract to “Place 1 Recon Operatives token on Small Dropsites, 2 tokens on Medium Dropsites, and 3 tokens on Large Dropsites. If a Ship may launch Assets to deploy a Battalion token to that Dropsite, they may instead Extract Recon Operatives from that Dropsite equal to the number of Battalions that would be placed. The Extracting Ship gains those Recon Operatives. A Ship cannot Extract more Recon Operatives than the Dropsite has.

Players are awarded 2VP at the end of the game for each Recon Operative token left aboard their Ships.

Players are awarded 1VP at the end of the game for each enemy Ship they have destroyed with any number of Recon Operatives.

Once onboard a Ship, Recon Operatives cannot be removed. Recon Operatives on Payload Ships are transferred to a Porter Ship when the Payload Ship attaches to it.”

12.1.5.1 Standard Scoring

Change the last sentence to “Standard Scoring awards VP during the Victory Points step of the End Phase on rounds 4 and 6.”

12.3.1 Key Site

Change the 1st sentence to “Nominate one Dropsite at least 24” from your Deployment Zone before the game.”

12.3.2 Priority Target

Change the 1st sentence to “Nominate one Dropsite at least 24” from your Deployment Zone before the game.”

12.3.3 Long Shot

◊ Change the 2nd sentence to “If you have destroyed it, or a deployed enemy Deployable Feature within 12" of their Deployment Zone at the end of the game, gain 2VP.”

12.3.6 Gather Intel

Change to “You are awarded 1VP whenever you Survey Dropsites. Any Capital Ship within 6” of the Dropsite and able to fire Weapons may substitute all attacking and launching that round to Survey it. Each Dropsite may be Surveyed once per player per game. A maximum of 2VP may be scored using this Secondary Objective. If the Scenario normally uses Survey, these VP are scored in addition to those in the Scenario.”

Change the 1st sentence to “You are awarded 1VP whenever you survey a Dropsite at least 24” away from your deployment zone.”

2.3.7 Decapitate

◊ Change to “You are awarded 2VP if an opponent's highest-level Admiral has been killed for any reason (or one of if there are multiple with the same Level).”

12.3.8 Objectives Beyond

Change the last sentence to “If you do and that Ship is not Crippled, gain 1VP. If that ship was H or C tonnage, gain 2VP instead.”

Special Rules

14.1.1 Aegis-X

~~r1.4 Change to "All Ships with this rule in a Group combine their X values into a single value, Y.~~

~~Friendly Groups in coherency within 6" of a Ship with this rule and the same Orbital Layer (including its own Group) gain the benefits of Aegis.~~

~~When rolling saves against Close Action and Bomber (of any type) attacks, those Groups gain Y additional save dice they may add to those saves. Before rolling to save, the defending player assigns these dice against specific weapons, divided up as they choose (including any modified hits).~~

~~An Aegis Group can only grant the benefits of Aegis once each time a friendly group is attacked.~~

~~A friendly Group can only benefit from Aegis from one Group each time it is attacked."~~

◊ Change to "All Ships with this rule in a Group in coherency combine their X values into a single value Y.

Friendly Groups in coherency within 6" of a Ship with this rule and the same Orbital Layer (including its own Group) gain the benefits of Aegis.

When rolling saves against Close Action and Bomber (of any type) attacks, those Groups gain Y additional save dice they may add to their Energy or Kinetic saves. Before rolling to save, the defending player assigns these dice against specific weapons, divided up as they choose (including any modified hits) between any Energy or Kinetic saves.

An Aegis Group can only grant the benefits of Aegis once each time a friendly group is attacked.

Aegis has no effect on Backup saves or saves that replace Energy and Kinetic saves (such as Shield saves).

In addition, Ships benefitting from Aegis increase the number of bombers required to trigger Saturation Fire by Y.

e.g. A Ship benefiting from Aegis-2 would suffer one Core hit per bomber above 8, rather than 6."

14.1.5 Detector

Change the last sentence of the 1st paragraph to "If it does, at the end of its activation place two Spikes on an enemy Group in line of sight. A Group that uses Detector gains a Spike (regardless of the amount of Ships using this rule)."

14.1.6 Escort

~~r1.4 Change to "After Weapons have been assigned to a friendly Ship of H or C tonnage within 6" of this Ship on the same Orbital Layer, you may declare the use of Escort for the friendly Ship. Only one Group may Escort at a time and it must be in Coherency.~~

~~After your opponent rolls to hit the original target, allocate an amount of hits from that roll to this Group. An Escort Group cannot be allocated more damage by those hits than each remaining Ship in it has in starting Hull. You may use this even if the Escort Group is out of range, arc, and line of sight of the attacking Group. Continue the attack sequence using the Escort Group.~~

~~Weapons with the Focused rule cannot be affected by the Escort rule."~~

~~*E.g. an Escort Group has 2 Ships with a starting Hull of 5, with one down to 3 Hull remaining. When you use Escort, you may assign up to 10 damage worth of hits to the Escort Group (so could be 10 damage 1 hits, or 5 damage 2 hits) regardless of their current remaining Hull.*~~

◊ Change to "At the start of the game, before deployment, you may assign this Group to escort a friendly Group of H or C Tonnage. An Escort Group and its escorted Group are a pair, no other Groups can be part of this pair. Until either Group is destroyed, the pair activate and perform their actions (moving, turning, attacking, etc) simultaneously and count as a single Group when generating pass tokens. The pair do not need to choose the same Order when they activate. Escort Groups are deployed alongside their escorted Group, ignoring tonnage restrictions for the Escort Group. The pair do not need to be in coherency, however while both Groups are within 6" of each other they ignore Saturation Fire from enemy Bombers."

14.1.7 Gateship-X

Change the 1st paragraph to "Shaltari Motherships must launch their Dropships via a Ship/Dropsite with this rule (sometimes referred to as Gateships). Each Gateship can have up to X Dropships deployed from it each round. Note: though the launch is measured from the Gateship, it is the Mothership that is launching."

Add the following paragraph "When this Ship goes on the ~~Weapons Free~~, Max Thrust, or Damage Control orders, it reduces its Gateship-X value to 0 until the start of its next activation."

◊ Remove "Weapons Free" from the last paragraph.

14.1.10 Mothership

◊ Change to " Shaltari Motherships can only deploy their Dropships via friendly Ships or controlled Dropsites with the Gateship-X special rule (sometimes referred to as Gateships).

These Gateships must be within 18" of the Mothership or part of a chain of Gateships with each Gateship in the chain being within 18" of another. Note: though the launch is measured from the Gateship, it is the Mothership that is launching."

14.1.11 Payload S/L-X

Add the following sentence to the end of the 3rd paragraph "Crippling Effects, Spikes, and other rules that affect an entire Group only affect the targeted Payload Ship.

Add the following paragraph "Payload Ships take up X of a Porter Ship's capacity."

14.1.12 Porter S/L-X

Change the 1st paragraph to "This Ship may be assigned Payload Ships with the same letter up to a total capacity of X."

Add the following sentence to the end of the 2nd paragraph "Any tokens, Spikes, or effects affecting the reattached Payload Ship are removed from that Ship."

14.1.16 Shield-X

~~r1.4 Change to "This Group has a Shield Save of X+. After Weapons have been assigned to this Group or Assets attack this Group, you may declare the use of Shield Saves for this Group. If you do, this Group replaces its Energy and Kinetic Saves with their Shield Saves for that attack sequence. Shield Saves can be used against Energy, Kinetic, and Core damage and ignore any modifiers to Energy and Kinetic Saves. Backup Saves may then be used after Shield Saves as normal.~~

~~A Group gains a single Spike each time it uses its Shield saves (regardless of the number of saves made per use).~~

~~Hits caused by Boarding Actions cannot be saved by Shield Saves."~~

◊ Change to "This Group/Dropsite has an unmodifiable Shield save of X+.

At the start of this Group or Controlled Dropsite's activation, you may choose to raise its shields. If you do, this Group/Dropsite gains a shields token until the start of its next activation.

While a Group/Dropsite has a shields token, it replaces its Energy and Kinetic saves with its Shield save and triples its Signature value (before Spikes). Shield saves are used against all hits from weapons before making Backup saves. Shield saves must be used before making Backup saves against Core hits. After being attacked, a Group with a shields token gains a Spike.

A Group on Silent Running loses any shields tokens it has and cannot have shields tokens.

Groups that Directly Deploy may start the game with a shields token.

Core Hits caused by Boarding Actions and Saturation Fire cannot be saved by Shield Saves."

14.1.19 Vectored

◊ Change to "This Ship may make an additional turn, up to 45 degrees, at any point during its movement, regardless of the Order its Group has taken."

14.2.1 Air To Air

◊ Change to "This weapon ignores the penalties for attacking Ships in Atmosphere while the attacker is also in Atmosphere."

14.2.2 Alt-X

Change the 1st paragraph to "Only one Weapon or Load with the same Alt value on the same Ship may be used by that Ship each round."

14.2.5 Arrest-X

◊ Change the last sentence to "A Ship affected by this rule multiple times before it activates uses the highest X value it is affected by to determine its Thrust reduction."

14.2.5 Bloom-X

◊ Change to "When you attack with this Weapon System (including separate attacks generated by the Volley-X special rule), the attacking Group gains X Spikes."

14.2.6 Bombardment

Add the following paragraphs "When attacking a Ship in Orbit with this weapon, it always hits on a 6+ and can never cause a critical.

This weapon cannot be used to attack Ships in Orbit while the attacking Ship is in Atmosphere"

14.2.9 Close Action

◊ Change to "This weapon does not benefit from Formation Benefits and can only be assigned to targets within Scan range and on the same Orbital Layer as the attacker."

14.2.11 Crippling-X

Change to "If an attack from this Weapon scores **at least one** Critical hit and then damages a Ship (following normal damage allocation rules), the damaged Ship gains the stated X Crippling Effect regardless of Tonnage. If no effect is listed, roll 2D6 and apply the corresponding Crippling Effect (from the Crippling Effect table).

Crippling Effects caused by Crippling Weapons are in addition to those caused by 7.3.6 Roll for Crippling Effects.

Except for Fire, **a Ship can only have one of each type of Crippling Effect token at a time** (Spikes are not a Crippling Effect), even when placed from different sources or at different times. Any duplicate effects are ignored and discarded."

14.2.13 Escape Velocity

Add the following paragraph "Close Action weapons with this special rule may be used against targets in Orbit while the attacking Ship is in Atmosphere."

14.2.14 Flash-X

Change to "When this Weapon inflicts damage, **the damaged Group** (or Ship if it ignores the usual coherency rules) gains X Spikes"

14.2.15 Focused

Change the last sentence to "Damage caused by this Weapon is allocated to only the target."

14.2.17 High Power

Change to "Unless the attacking Ship is on the Weapons Free Order, attacking with this Weapon counts as attacking with two Weapons (though it only fires once).

Ships with only a single High Power Weapon can only attack with it while on the Weapons Free Order."

14.2.18 Impel-X

Change to "If an attacking Group scores at least X critical hits with this Weapon System against a Group, choose one of the following for each affected Group:

- Turn all Ships in that Group 45 degrees in the same direction. If the Group scored at least twice X, turn all Ships in that Group 90 degrees in the same direction instead.
- Move all Ships in that Group up to twice X in inches directly forward (measuring from the affected Ships). Ships moved this way cannot be moved into Large Objects or off of the table.

A Group can only be affected by each effect once per Weapon System per attack sequence."

14.2.22 Mauler

◊ Change to "The Lock value of this weapon is equal to the target's save value against this weapon's Type."

14.2.25 Re-Entry

Add the following paragraph "Close Action weapons with this special rule may be used against targets in Atmosphere while the attacking Ship is in Orbit."

14.2.26 Scald-X

~~r1.3 Change to "If this weapon attacks a target within Scan range, reduce the target's Energy/Kinetic save against this weapon's attack (other attacks and weapons are unaffected)."~~

~~r1.4 Change to "If this weapon attacks a target within Scan range, reduce the target's Energy / Kinetic save against this Weapon's hits by X (other attacks and Weapons are unaffected)."~~

◊ Change to "If this weapon attacks a target within Scan range of the attacking Ship, reduce the target's Energy / Kinetic save against this weapon's hits by X (other attacks and weapons are unaffected)."

14.2.27 Status

~~r1.4 Change to "When you hit with this Weapon, pick one of the following tokens; Defence Systems Offline, Scanners Offline, or Navigation Offline. At the end of the Inflict Damage step, choose one of the defending Ships to gain the selected token, regardless of the amount of damage caused by the attack or amount of hits saved. This token is automatically removed at the start of the End Phase, before making repairs."~~

◊ Change to "When you hit with this Weapon, pick one of the following tokens; Defence Systems Offline, Scanners Offline, or Navigation Offline.

At the end of the Inflict Damage step, for each unsaved hit from this weapon, choose one of the defending Ships to gain the selected token, regardless of the amount of damage caused by those hits.

This token is automatically removed at the end of the affected ship's next activation or the start of the next End Phase, before making repairs (whichever is first).

Tokens gained from this rule are counted separately from normal Crippling Effects. A Ship may only have one of each type of these tokens gained due to this rule."

14.2.29 Volley-X

◊ Change the 1st sentence to "This Weapon counts as 1 Weapon System for Orders purposes."

Change the 3rd sentence to "Once assigned, treat each allocation as a separate weapon for the subsequent steps in the attack sequence."

14.2.31 Anti Wing

◊ Add the following paragraph "When this weapon is assigned to a Torpedo, it reduces its Lock value by 1 instead of always hitting on a 6+."

FAQ and Errata

FAQ

Miscellaneous Questions

Why aren't my bases clear?

Bases have a protective film on the underside, once peeled off the base is clear. You may need to use a craft knife to scrape the edges of the film to get it to start to release.

What's the most recent rulebook?

The one with the orange cover with the Bioficer Cruiser front and centre.

What Ships should I start with?

The suggested starting ships are on each faction's quick start rule sheet. These will usually be a Fleet Carrier, Troopship, Cruiser, Strike Carriers, combat based Frigates, and a supporting Frigate of some type. Some fleets will differ slightly, but the suggested first builds will be similar in roles.

Instructions can be found in the Dropfleet Commander resources section on the TTCombat webstore.

Core Rules

Is a Dropsite a Ship?

No. Dropsites are not Ships.

Is a deployable Feature a Ship?

No. Features of any kind are also not Ships.

Is a Ship with Battalions on it a Dropsite?

No. Ships are not Dropsites.

Is a Space Station a Ship?

No. A Space Station (both scenario and fleet space stations) are Dropsites and not Ships.

Is a Space Station a City?

No. Space Stations and Cities are two different types of Dropsite.

~~**r.14 Can you use an AP to re-roll a re-roll? Can I ever re-roll a dice more than once?**~~

~~No. Dice can only be re-rolled once, regardless of the source of re-rolls.~~

~~E.g. You use a Fighter that grants 2 re-rolls to re-roll a single dice in a Kinetic Save. You are only able to re-roll that dice once, the second re-roll is lost as the dice can only be re-rolled once. The second result stands, even if it is worse.~~

~~**r1.4With AP Re-roll, do you need to declare re-rolling multiple dice at the same time?**~~

~~Yes. State the amount of dice you will be re-rolling before re-rolling any dice.~~

How do modifiers work? Do I apply them in sequence, or add them all together before rolling?

Total up all modifiers for a roll, then cap it between a 2+ and a 6+.

What's the order of resolving re-rolls when players roll simultaneously?

The active player declares the use of their re-rolls first, then each other player in initiative order declares the use of any re-rolls. Players then re-roll their dice simultaneously. Any player that decided not to re-roll cannot then decide to re-roll after everyone else.

When a Ship in Atmosphere moves, does it move 2" or 1"?

That Ship moves an amount equal to the distance allowed by its order, reduced to a maximum of 2". If that Ship had a Thrust of 12" and went on General Quarters in Atmosphere, it would move 2" as its 6-12" movement is reduced to 2" due to Atmosphere.

When I move a Group and a Ship is directly in front of it blocking its movement, can I stop my Group's move in base contact with the blocking Ship?

Ships do not block movement, only where they may end their movement. If the Group's Order would give it a legal movement distance beyond the blocking Ship, you move the group into the legal movement area. Only if the legal movement area is full would you move a Ship back along its line of movement.

Can you choose an Order which you know will cause Ships to move out of coherency (e.g. Weapons Free on Ships with diverging courses)?

No. You may not end a Group's movement with any Ships out of Coherency if it's possible not to (you'll need to choose a different Order).

FAQ and Errata

When a rule states something suffers a hit but does not specify how much damage that is, how much damage is that hit?

Hits that do not specify an amount of damage have a damage value of 1.

When saving a hit from a damage 2 weapon, do I roll 1 save or 2?

1 save, damage is saved per hit, not per point of damage.

Which player allocates damage from attacks, for example when there's damage from a high damage focused weapon and a lot of weaker non-focused weapons?

The attacker decides on the order of damage allocation. In this example the player could allocate the damage caused in the most efficient way to cause the most damage to the enemy Group.

How do you determine the amount of weapons on General Quarters to use when High Power, Overcharge, and Volley are involved?

General Quarters allows a Ship to attack with half of its available weapons (rounding up). If that Ship has three weapons listed on its profile, it can attack with two weapons, or one High Power weapon, or one weapon on Overcharge.

Volley weapons count as a single weapon (as there is only one weapon on the profile), but assign their attacks multiple times, so a Volley-2 weapon with an Attack value of 3 would be able to assign 3 dice to one target and 3 dice to another target.

High Power (or Overcharged) Volley weapons will count as two weapons but still assign attacks as per the Volley rule. A ship with one High Power Volley weapon and one other weapon will need to be on Weapons Free to attack with the High Power Volley weapon (as it needs the ship to be able to attack with two weapons).

How many weapons do Ships attack with when on Weapons Free, can I choose to attack with infinite weapons despite there only being 3 listed on a profile?

The maximum number of Weapons a ship may attack with is the number of Weapons it has on its profile. If a Ship has 1 Weapon listed, it attacks with a maximum of 1 Weapon on Weapons Free. If a Ship has 3 Weapons listed, it attacks with a maximum of 3 Weapons (not taking any special rules into account).

If a Ship goes on Weapons Free, can it attack with all of its weapons and use the Detector special rule?

If that Ship only has a single Weapon on its profile, it cannot use Detector and attack while on Weapons Free. Detector requires you to forgo one allowed Weapons use, which in this case is the only Weapon that Ship has.

If that Ship has a special rule that counts as an additional Weapon for Detector, then that Ship may attack with its singular Weapon as well as use Detector while on Weapons Free.

If a Ship with a High Power Weapon, a Low Power Weapon, and Detector goes on Weapons Free, can it use all of these?

No. To use Detector, you must forgo attacking with one of those Weapons.

Can a Ship with a High Power and non-High Power Weapon attack with both while on Weapons Free?

~~r1.2 No. Only one Weapon may be used on Weapons Free in this case. If the secondary Weapon here was Low Power, the Ship could attack with both on Weapons Free.~~

Yes.

Do I apply the effects of scenery when the base or stem overlaps a scenery piece?

The stem.

~~r1.4 Can I alternate between a Ship and its Lead Ship when determining arcs for a Broadside Volley weapon?~~

~~No. Allocate all of a weapons' Volley allocations from the same Ship.~~

FAQ and Errata

Can I choose to have more than one Lead Ship in a Group?

No. A Group can only have a single Lead Ship, chosen at the start of the Group's activation.

When using Formation Benefits to measure weapons range, is it using the Scan of the Lead Ship or the attacking Ship?

The attacking Ship.

How does movement and turning work in the Course Change Order? Can I do them in any order or is it in a specific order?

Like other orders, Course Change is written in the order you perform each step in the Order. Ships on Course Change follow this order for their movement and turning:

1. A first turn, up to 45 degrees,
2. Move up to half of its Thrust,
3. A second turn, up to 45 degrees.

You may forgo either the first or the second turn for the entire Group (so either the turn before movement, or the turn after movement) to launch assets at the end of the Group's activation.

When is a ship considered to have moved off of the table?

When the stem is moved off of the table.

How does a player determine the amount of pass tokens?

Pass tokens are generated when a player has two or more activations than another player. You generate an amount of pass tokens equal to one fewer than the difference in activations.

E.g. if one player has 5 activations and another 8, the player with 5 activations will generate 2 pass tokens.

Admirals & Abilities

What game size can a Level 1 Admiral be used in?

Any game size.

What game size can a Level 5 or higher Admiral be used in?

Battle and Reconquest.

What about a Level 5 or higher Famous Admiral?

Battle and Reconquest.

Can I bring a Famous Admiral and a Faction Admiral in the same fleet?

No. You may use either a Famous Admiral or a Faction Admiral, but not both.

If I have more than one Admiral on the table, how much AP do I generate?

1 plus the level of the highest level Admiral on the table. Only your highest-level admiral present on the table counts towards any rules that specify one.

E.g. you have a level 2 and level 3 admiral on the table. You would generate 4AP during the Ability Point Generation step of the Planning Phase.

How does taking faction abilities work? Do I have access to all of them, or only those I pick with a famous or faction admiral?

Only those abilities taken by a faction or famous admiral can be used, if you don't take any of these additional abilities, they may not be used. Non-faction admirals cannot take faction abilities.

~~**Can I reduce a Group to 0 weapon uses by using the Weapons Hack ability?**~~

~~Yes.~~

What's the total Admiral Level of "Granite" Halsey, is his Admiral Level 5 or 7?

After applying his Washington's Command Ship-2 special rule, his Admiral Level is 7.

~~**r1.4 Can the Biofiicer Prismatic Surprise ability be used to swap the payload of a ship that has a payload and one that does not have a payload?**~~

~~No. Both ships must have a Payload attached.~~

How long do Abilities last, is it until the end of the action, the activation, or the round?

Abilities that persist last until stated in the Ability itself. Some Abilities happen instantly, like re-rolling dice in a roll, these only apply to that roll and do not affect other rolls you make.

If an Ability states "until the end of the round" it lasts until the end of the round. If an Ability states "for that attack" it lasts until that specific attack sequence ends.

How many times can an Ability be used each round?

Abilities can be used multiple times each round, but those that have a condition on when they can be used, such as "When you activate a Group…", can only be used once per condition.

How does taking Admirals work, how many of each type of Admiral can I take?

You may take any number of admirals from 4.2.1 Admirals, including multiple of the same level. In addition to those you may take a single Faction/Famous admiral.

Do Admirals contribute their points to the Ship they are assigned to when building a fleet?

No.

If I only take a Faction or Famous Admiral, do they also get the Abilities in 4.2.1.1 Abilities and Ability Points?

No. Faction and Famous Admirals do not gain the Abilities in 4.2.1.1. YOU have those abilities in 4.2.1.1, even if you have no admirals on the table or they are all dead, you always have access to the 4 core abilities.

What's the total Admiral Level of "Granite" Halsey, is his Admiral Level 5 or 7?

After applying his Washington's Command Ship-2 special rule, his Admiral Level is 7.

If I have a Famous Admiral on the table as well as a higher-level generic Admiral, how many AP do I gain in the Planning Phase?

You gain 1 + the highest Level of your admirals on the table, regardless of their fame.

e.g. you have Typhoon Vasquez and a Level 3 Admiral on the table. You would gain 4 AP as your highest-Level Admiral is Level 3.

If I have a Famous or Faction Admiral on the table as well as a generic Admiral, what Abilities do I have access to?

You have access to the 4 core Abilities plus the Abilities of the Famous/Faction Admiral (their stated Abilities plus any selected from the corresponding faction table). The Abilities of the Famous/Faction Admiral are lost when that Admiral has been killed (though some may have rules that persist that aren't Abilities – these will be stated in that Admiral's rules).

If I choose one Faction Ability in one of my two lists, can I take that same Ability in my second list?

Yes. Restrictions on taken Abilities is per-list.

Do you have to re-roll all dice in the hit roll when using the Scourge Point Blank Death Ability?

Yes. Re-roll the entire hit roll for weapons assigned to the enemy group.

Attack

~~r1.3 When do Capital Ships explode? Is it when they are destroyed? When it takes 3 or more damage? Does it have to be from an attack?~~

~~Ships explode when both of the following conditions are met:~~

- ~~That Ship becomes destroyed.~~
- ~~The entire attack(not just a single Weapon) inflicts at least 3 damage to the destroyed Ship.~~

If I improve the Lock of a weapon enough, will the result needed for a crit keep going down?

No. Lock is clamped between two values, 2+ and 6+. It can never be improved below a 2+ (which means crits can't be brought below a 4+ this way) and can never be brought above a 6+.

Can a Ship ever have more than one of the same Crippling Effect token?

No. Except for Fire, a Ship cannot have more than one of any type of Crippling Effect token. Subsequent Crippling Effect tokens are discarded.

FAQ and Errata

What if a Ship has a Crippling Effect then gains another one or more of the same Crippling Effects from a rule like Crippling-X?

The additional identical Crippling Effects are discarded, and the affected Ship does not get any of those identical Crippling Effect tokens.

If I use a weapon with Broadside arcs and the Volley special rule, can I use it on a group with ships on both sides of the attacking ship?

Yes. As long as the targeted ships in that group are in different broadside arcs, you can use multiple volley allocations on the same group.

Do I have to attack a target on each side of a Ship using a Broadside weapon with Volley?

No, but if you only allocate a single side of a broadside you'll be missing out on half of the value of a broadside weapon.

What does the SSN in the Resistance Engineer's Subsystem Network mean? Do other Linked-X weapons work with it?

The SSN stands for Sub System Network. Only weapons with the same linked value can be used together, so only weapons with Linked-SSN can be used together and cannot be used with other Linked values. Linked values aren't limited to numbers, so Linked-1, Linked-A, and Linked-SSN are 3 separate values.

What happens if a Ship is exactly between two arcs?

The attacker chooses a single arc for that Ship to be in. It cannot be in both arcs.

Can I use Fighters Close Protection against an attack with Scald-X, like Oculus weapons?

Only if that weapon has the Close Action special rule. Weapons without the Close Action special rule are not Close Action weapons.

If something causes nondescript damage, what saves do I use against it?

If an effect causes damage, that damage bypasses any saves a Ship may have and skips straight to 7.3.5 Inflict Damage. Only hits are saved against, damage is applied directly to a Ship.

Launch Assets

Can Asset tokens overlap other Asset tokens?

Yes.

Can Bulk Landers, Dropships, Boarding Pods, and Drop Pods be placed measuring from the Lead Ship?

Yes, while that Group is benefiting from Formation Benefits.

Are Shaltari Battleships supposed to have Bulk Landers?

Yes.

Do fighters and bombers expire? Do they stay on the board between rounds?

Launch Assets persist between rounds, allowing you to build up larger wings over multiple rounds.

If an attack from a Mine destroys a Capital Ship and an explosion occurs, where is the explosion measured from?

~~The Capital Ship at the end of its movement.~~

From the point chosen for the Mine's attack.

How do I form wings? Do I need a token for every Fighter/Bomber in that wing?

When you form wings, all Fighters/Bombers combine into a single token. Use a dice to show how many assets are in that wing.

When do Fighters and Bombers form wings?

Wings are formed after you have moved all of those types of assets, before attacking with them. If you have multiple wings of those assets touching, you may choose which of those wings become part of a larger wing, pick one wing and add the additional assets to that one.

When Fighters and Bombers deploy, can they immediately form a wing or join another in range?

No. Forming a wing must be done after movement (though you may divide into smaller wings when launching).

FAQ and Errata

When do Fighters and Bombers divide into separate wings?

They do so at the start of their movement. Place the new Wing within its Thrust of the dividing Wing, then move the dividing Wing.

Do Assets block movement like ships, can I blockade an area with multiple wings of Bombers?

Assets are tokens and tokens do not block movement. Ships may end their movement on top of tokens and may freely move through them. If you're using 3d Assets, it's probably best to place these on top of the Ship's base if they overlap, or use a 2d version of that token.

~~**Can I Boarding Pods my own Ships to deter boarders?**~~

~~Yes.~~

Do I need to be in Atmosphere to use Drop Pods?

Drop Pods can be used while the launching Ship is on any Orbital Layer but are always launched at Cities.

If I have a Carrier in Atmosphere and launch assets at a City with its centre under scenery, does the asset have to make saves?

Only if it moves through scenery to get to the centre of the City. Treat the centre of the dropsite as having a 3mm centre (like the stems of Ships and Space Stations). A Planetary Ring would have no effect (as it has no thickness) however a Micrometeor Cloud or Debris Field wholly over this imaginary 3mm centre would affect assets appropriately.

Scenery

If there is a planetary ring and I have a ship with 12" thrust, if I max thrust exactly 24" precisely on top of the planetary ring, which side am I on?

Both.

Dropsites

How do you measure to Dropsites and Features? Do you measure to the edge of the Dropsite or its base, or the centre of Features?

Measure to the centre of the Dropsite or its stem (marked on the printed Cities and Space Stations).

How specific is the specific template size for Cities? What are the template sizes for Cities?

Cities use the templates found in the 2-player starter, Dreadhold box, and in our resources section. We recommend using templates of this size, but any template with similar area and a roughly 2" radius will also suffice. You are of course free to use differently shaped/sized templates if you and your opponent so choose.

When a rule relating to a feature says "this Dropsite", is it referring to the feature, the dropsite the feature is on, or any dropsite?

The Dropsite the Feature is on or deployed to in the case of deployable Features. It is a shorthand for "this Feature's Dropsite".

When I have to deploy Battalions to a Dropsite, can I put them on a Feature on that Dropsite?

Yes, when you deploy Battalions to a Dropsite, you may instead deploy them to a specific feature on that Dropsite.

How many Bulk Landers are needed to deploy a Battalion to a Dropsite that has enemy Battalions on a Feature?

Two. For each Battalion you want to place on a Dropsite with enemy Battalions, you will require two Bulk Landers (so you would need 6 Bulk Landers to place 3 Battalions).

Can I split up deployed Battalions across multiple Features?

No. Deploy the specified amount of Battalions to a Dropsite, then you may assign those to a single Feature.

FAQ and Errata

If a Dropsite with multiple Features is damaged and a player has an equal amount of Battalions on each Feature, how are the Battalions removed?

The player that controls the Battalions decides which to remove. This can be from a single Feature, or split across multiple Features.

If a City has, for example, an icon of a Feature as well as two blue circles, is it a small City, or medium City?

The size of the City is determined by the number of icons on it. A City with two icons (of any type) on it is a small City, three icons is a medium City, and four icons is a large City.

If Player A has Battalions on a Dropsite and the opposing player has deployed a Feature to that Dropsite, does Player A control that Dropsite?

No.

If Player A deploys a Feature to a Dropsite the opposing player has Battalions on, can Player A activate that Feature?

Yes.

Can I use a Pass Token on Dropsite and Feature activation?

No. Pass Tokens can only be used instead of activating Groups. They may not be used on anything else.

Do deployable Features count towards the cost of the ship?

Some deployable Features cost points but do not count towards the points of that Ship. If the Ship carrying them is destroyed, those features contribute their points towards any Kill Points for the scenario.

~~**r1.4 When a Dropsite is damaged by an attack that deals more than 4 damage, and you remove a feature, what order is the damage dealt and the feature removed?**~~

~~Remove Features first, then apply any remaining damage. The 4 damage required to remove a Feature is lost when the Feature is removed and not used when Battalions are removed.~~

Scenarios

How does scoring work when a variant awards additional Standard Scoring? How much VP is awarded and when?

When a variant awards additional Standard Scoring, use the table in 12.1.5.1 Standard Scoring to determine the amount of VP awarded. This is awarded in the Victory Points step of the End Phase.

E.g. If Protect is the variant, the player that controls the Large Dropsite they have chosen to Protect gains 4VP from Standard Scoring (due to controlling a Large Dropsite), then an additional 4VP for controlling their chosen Large Dropsite.

~~**r1.3 How do you deploy ships wholly within a deployment zone when it's 0", is it the base or the stem that must be wholly within the deployment zone?**~~

~~Each ship's stem must be in the deployment zone when their group deploys. They activate or continue their activation as normal, moving from that location. In the case of deployment zones that are 0" from an edge, the ship's stem must be in contact with the edge.~~

When using Directly Deployed, how do the ships not deployed at the start of the game enter the table?

Ships not deployed before the start of the 1st round may not be activated or deployed until the start of the 2nd round. From that point on they deploy as described in 12.1.2 Approach Type.

What are Scenario Dropsites?

Dropsites shown in the scenario diagram or specified in the scenario text. Dropsites you take as part of your fleet are not Scenario Dropsites.

FAQ and Errata

When you generate scenarios, can you skip sections you don't like?

If you're using the scenario generation section as a guide rather than hard set rules, substituting a section for house-rules will give you a better scenario than skipping sections. For example, if you don't want to use any of the variants, randomly assigning features is a viable substitution for rolling for a variant. Likewise if you have a preferred arrangement of scenery, that's a viable substitute for layouts.

When surveying a Dropsite, what constitutes a Ship being able to fire?

When that Ship is on an order that allows it to use at least one of its Weapon Systems. If a ship is unable to use its weapons for any reason, such as the Weapons Offline crippling effect, or having no Close Action weapons while on the Damage Control Order it cannot Survey. Range requirements are ignored when determining if a Ship can survey.

Can a Ship on Damage Control Survey?

A Ship on Damage Control can Survey Dropsites if it has a Close Action weapon. That Ship does not have to be in Close Action range of any enemy Ships to be able to Survey.

When Extracting Recon Operatives from a Dropsite using a Ship with the Gateship rule, does the Gateship get the Recon Operative or the launching Mothership?

The Mothership is the one that is launching, so gains the Recon Operative token.

How does the One World Trade Center work?

If you control the One World Trade Center's Dropsite at the start of the Asset Phase, pick a Dropsite. Remove all friendly Battalions from that Dropsite, then deploy them to that Dropsite as if you were following 7.4.1 Deploying Battalions, deploying them to the Dropsite, or one of its Features.

If I capture 100 points of Ships for Take Prizes, do they count as 100 points of Ships captured, or 200 points? What about Kill Points?

If you capture a Ship costing 100 points, you will gain 1VP from Take Prizes. This Ship counts as 200 points of Ships destroyed at the end of the game for victory conditions like Attrition and secondary objectives like Annihilate.

Do you have to deal all of the damage to a dropsite for the Priority Target secondary or do you only need to deal the killing blow?

You only need to deal the final blow to the dropsite.

What happens when an opponent destroys a dropsite you have chosen for the Priority Target secondary?

You can no longer score that secondary from that Dropsite.

Special Rules

How does Aegis work when there are modified hits? How do you divide Aegis dice up when there are regular hits, as well as hits with Critical-1 and other hits with Reave-1?

Before rolling to save, divide your Aegis dice against each of those 3 types of save you need to make. If you have 5 Aegis dice, you could add 1 dice to save the normal hits, 2 to the Critical-1 hits, and 2 to the Reave-1 hits.

How does gaining a special rule work when you already have that special rule? Are they additive or do you use the best available?

A Ship that gains a special rule it already has uses the best version of it.

A Ship that improves a special rule it does not already have, does not gain that special rule and only improves that special rule.

How does the Calibre special rule work with the Mauler special rule?

Use the Mauler rule to determine the Lock of the weapon, then improve the Lock of the weapon by 1 against the applicable Calibre targets.

FAQ and Errata

Can Ships with a Scanners Offline token still use the weapon range and line of sight of their Groups Lead Ship?

Those Ships may measure line of sight from the Lead Ship. Weapon range may be measured from the Lead Ship but uses the Scan of the attacking Ship.

Can I use a Shield Save against a Core hit?

Yes. Shield Saves can be used against any damage type.

If I use a Shield Save to replace a Kinetic or Energy Save, can I then use a Backup Save?

Yes, the Shield Save only replaces the Kinetic or Energy Save, Backup saves can still be used after a failed Shield Save.

Can I use a Shield Save to replace a Backup Save?

No. Shield Saves can only replace Kinetic and Energy Saves.

~~**r1.4 Does the Defence Systems Offline status stop a Ship from using its Shield Saves?**~~

~~Yes.~~

Are tokens gained from the Status rule Crippling Effect tokens?

Yes.

What happens if a Ship is attacked with a weapon with Status and Focus, does any Ship in the Group gain one of the chosen effects, or is it just the focused Ship?

Only the targeted Ship. Same answer for Ships that have rules that cause them to be targeted individually.

What does the X mean in the Payload and Porter rules?

The X in the Porter rule is the capacity of the Porter Ship, while the X value in the Payload rule is the amount of capacity that Payload Ship takes up.

E.g. A Porter S-2 Ship can be assigned up to 2 Payload S-1 Ships.

Can a Ship with Payload launch assets while attached to a Porter Ship?

No. Payload Ships cannot activate while attached to a Porter Ship and cannot move, launch, or attack while attached.

Does a Group of Ships with the Porter special rule have to take all of the same payload ship?

No. Payload Ships can differ across a Group, so a Group of 3 Porter Ships could have 3 different Payload Ships across all 3.

When can a Porter Ship detach/reattach a Payload Ship?

Before or after the Porter Ship has completed a step in its activation. For example, it could reattach the Payload Ship before or after moving, but not during. Likewise for before or after attacking, but not during.

Can a Porter Ship detach its Payload if it is on an order that allows it to launch, but under an effect that prevents it from launching?

Yes. Payload only checks the Order the Porter Ship is on to determine whether or not it can detach. Other effects that prevent launching have no effect on detaching Payload Ships.

Are Payload Ships launched?

No. Payload Ships are detached.

What penalties are ignored when attacking a Ship in Atmosphere with a Bombardment weapon?

Bombardment weapons attacking Ships (including Descent Ships) in Atmosphere ignore the Lock reduction of 1 and the “always hits on a 6+” rule.

~~**r1.3 If I reduce one of my own ships using the Overcharge rule to 0 hull points with 3 or more self damage from Overcharge, does that ship explode?**~~

~~Yes, if that attack caused the firing ship to lose 3 or more hull points the attacking ship explodes. Remember to resolve explosions that happen at the same time in a random order though!~~

Who rolls for the crippling effect from the Crippling-X special rule? Who rolls if the defending ship gets crippled normally as well as a crippling effect from the special rule?

The attacker rolls for their Crippling-X rule and the defender rolls for their crippling damage as normal.

FAQ and Errata

Does the Crippling-Fire special rule allow multiple Fire tokens to be placed per attack, or is it a maximum of one per attack?

~~r1.2 Yes, a single attack can cause multiple Each critical that causes damage gives the defending ship a Fire token.~~

Only one token is applied and only if both of the following are true:

- That weapon's roll to hit results in at least 1 critical.
- That weapon's attack successfully inflicts damage.

~~r1.3 What is the order of resolving Regenerate-X and a Fire token at the end of a Group's activation?~~

~~The controlling player chooses the order of these simultaneous effects.~~

How much of an attack can a Shield Save be used against, a single weapon, or the entire attack?

The entire attack.

~~r1.3 Can you use Shield Saves against hits caused by Fire Tokens?~~

~~Yes.~~

Can Bombardment weapons be used against Groups on the same Orbital Layer?

Yes.

How do rules like Corruptor-X work with weapons with multiple attacks, does the target get X tokens for each point of damage, each hit that deals damage, or the whole attack?

When the weapon successfully inflicts any amount of damage. A Torpedo with 2 attacks and Corruptor-2 would be able to place 2 Battalions on the target, regardless of the amount of damage. A Wing is counted as a single weapon when it attacks, and would only trigger effects like Corruptor and Crippling once, regardless of the number of assets in that Wing.

How does Volley work with Overcharge?

You overcharge the weapon before allocating its volleys. Each volley allocation is then overcharged.

How does Volley work with an Oculus token, or a Telescope token?

The token would affect all allocations of that weapon & Weapon System. It is removed when you allocate, and affects a Weapon System, so any weapon using that statline is affected.

How do Telescope tokens work with Reinforced Armour?

The effects that alter the Lock value required to score a crit cancel each other out and that weapon crits on its normal results.

How does alternating targets work with Broadsides with Volley-2, what about Volley-3 and Volley-4? Can I target the same Group on the same side if that Group is on both sides of the attacking Ship?

Under normal circumstances, a Volley-2 Broadside assigns attacks to targets on one side, then assigns attacks to targets on the other side. If you line an attack up so that a single group is on BOTH SIDES of an attacking ship's Broadside arcs, you can attack that Group with both Volley attacks, as it's the same group on different sides.

Volley-4 would alternate between sides assigning targets. If there are no viable targets on a side, skip to assigning the next side's target. Any attacks skipped this way are lost.

Do I need to keep alternating Volley sides when attacking with multiple Broadside weapons? What about across rounds?

Treat each use of Broadside weapons separately. You do not need to alternate between attacking weapons, or ships (so can start with the same side on each attacking ship), or between rounds (so can start with the same side over multiple rounds).

Can I measure one allocation of a Volley weapons' range from a Lead Ship and another allocation from the attacking Ship?

No. Volley uses must be measured from the same Ship for all of that weapon's allocations.

FAQ and Errata

If I use the Detector rule and choose to forgo the use of a weapon with Volley, does that weapon still get to attack with a reduced Volley count?

No. You forgo the use of the Weapon prior to the extra allocations due to Volley. No extra attacks are generated by the Volley rule as the Weapon isn't used in the first place.

When I reattach a Payload Ship, am I able to deploy it again in the same round?

No. Reattached Payload Ships must wait till a subsequent round to be deployed again.

When I attack a target three rounds in a row with a weapon with Sustained Fire and 2 attack, how many attack dice does it have on that third attack?

4. The attack value doubles from 2 to 4 for the second attack. Then it doubles from 2 to 4 for the third attack.

Do Payload Ships launch like launch assets?

No. Payload Ships detach and attach.

If you launch a Payload Ship through terrain, is it treated as an Asset or Ship?

Payload Ships are Ships

Is a Weapon with Volley one Weapon System or multiple weapons for abilities and effects that key off of single Weapon Systems? e.g. Volley-2 and Telescope token on 9K Mass Drivers.

The amount of Weapons a volley Weapon splits into depends on where it is in the attack sequence. While you Determine Potential Targets, and when you Assign Weapons to Targets, the Volley Weapon is a single Weapon. From when you Roll to Hit and onwards in the attack sequence, a volley weapon splits into X different Weapons. Telescope tokens affect a Weapon System when you assign targets and will affect all X weapons. An Ability with the trigger of "when you roll to hit" would only affect one out of the X weapons.

Do you roll each dice for a Burnthrough-X weapon separately or simultaneously?

Roll the attack dice simultaneously for each separate weapon. If you have 3 burnthrough weapons with 3 dice each, you roll 3 lots of 3 dice.

Can I use the Gateship-X special rule from my opponent's Stellargates?

No, you can only use the Gateship-X rule granted by your own Stellargates.

When a Crippling effect has a multiplier in front of it (like Crippling-2xFire), how much damage needs to go through and how many tokens are placed?

Only a single point of damage from a weapon that has scored at least one critical hit needs to be inflicted for the noted amount of Crippling effects to be applied to the damaged ship.

E.g. a Gloam attacks with its Furnace Incisors, rolls a crit, and inflicts a single point of damage. The damaged ship receives two Fire tokens in addition to the damage caused by the attack.

Ships

Can I use "Counts As" Ships in a Group alongside the Ship they count as?

Yes. As long as they all count as the same Ship (including any loadout options), you can mix and match alternate sculpts.

E.g. a Group of 3 Osaka Light Cruiser containing a Saratoga, a Gen 1 plastic Osaka, and a Gen 2 plastic Osaka.

UCM Nuuk

Do you still need to roll to save against the 0 damage Core hits from a Nuuk?

Yes.

FAQ and Errata

UCM Venice

When a player uses Telemetry Link on a Group that uses the Max Thrust order, does the additional 4" movement apply before or after doubling the Ship's Thrust?

After. Telemetry Link does not affect Thrust.

E.g. A Ship with 4" Thrust on Max Thrust with Telemetry Link would be able to move 12", while a Ship with 12" Thrust on Max Thrust with Telemetry Link would be able to move 28"

Does Order to Fire allow you to turn while on Weapons Free?

No, Order to Fire allows you to use a weapon before moving while on Weapon Free but does not allow that Ship to turn while on Weapons Free.

PHR Calypso

How many weapons does the Calypso's Advanced ECM Suite affect when used against a Volley weapon?

Just one of those Volley instances, as the effect happens after all weapons have been assigned.

Shaltari Helium Voidflyer

Can a group of Heliums use Voidskip to move to or from a Dropsite affected by Mergen the Learned's Ancient Teleportation Node?

Yes.

Resistance Armstrong Destroyer

When using the Debris clearance rule to change a Debris Field into a Micrometeor Cloud, are any Ships and Assets underneath affected immediately, or when they activate?

When they activate.

Can the Armstrong's Debris Clearance rule be used to change the Field from an Agrippa into a Micrometeor Cloud?

No.

Resistance Cruisers

Am I limited to only a single structure hardpoint with a * on Resistance ships or am I able to give these ships several different structure options.

You may take one of each * option as long as you do not take duplicates on the same ship.

e.g. A Resistance Cruiser could have both Ablative Armour and a Drive Refit, but not two Ablative Armours.

Resistance Triumvir Battlecruiser

Can a Box of Scraps token be used to prevent a ship from being destroyed by a large solid object?

No.

Resistance Palatine Command Barge

Can the Palatine on Silent Running or Max Thrust use the Detector rule instead of attacking?

No.

Bioficer Hypersummoner

When I use any of the Bioficer summoning effects on bombers, do those bombers still get to attack?

Yes, those bombers replace the movement part of their activation, their attacks and the conditions for those attacks are unchanged by Summoner and Hypersummoner effects.

Civilian Provenance Ark

If a Provenance Ark damages a Dropsite that has a Genitor Tower on it with its Genesis Spikes, what happens?

The dropsite is inflicted damage, then Battalions are removed and a Mutant Fauna token is placed. After that, the Genitor Tower places 2 Battalions on the Dropsite. As these Battalions were placed but not deployed, no roll is made due to Mutant Fauna.

Deployable Features

Bioficer Genitor Tower

Can I deploy a Genitor Tower to a Space Station?

Yes. Deployable Features can be deployed to Space Stations.

Fleet Space Stations

Are Fleet Space Stations Dropsites, Ships, or Groups?

As stated in the Fleet Space Station document, Fleet Space Stations are Dropsites. Some special rules allow them to behave differently, these only come into effect when relevant.

How do I work out the side of the board for deploying a Fleet Space Station when my deployment zone is in the corner of a board? Do I pick one side, or both?

Your side of the board with corner deployments is half of the board, cut from corner to corner.

Can you overlap the bases of Fleet Space Stations?

No. You cannot overlap the bases of ANY Space Station. Fleet Space Stations are still Space Stations

Do Fleet Space Stations use orders like Ships?

No. Dropsites do not use Orders.

Does a player control their Fleet Space Station if it has no friendly battalions on it?

No. Fleet Space Stations follow the normal rules for controlling/contesting. Ownership of the miniature is irrelevant for controlling/contesting.

Can an Opal improve the Shield Save of Shaltari Fleet Space Stations?

No. Space Stations are Dropsites and not Groups.

Can I use Detector on a Fleet Space Station?

No. Detector places Spikes on Groups, not Dropsites.
